

powerful online approvals — anytime, anywhere!

The revolutionary **DALiM ES soft-proofing solution** brings powerful automation to your review and approval workflows, enabling internal and external team members to review, annotate, and approve color-accurate, ready-to-print documents from any web-enabled device.

Imagine how much more effective your organization can be with streamlined online file delivery and approval. DALiM ES provides comprehensive project management, review and real-time approval for all participants of from creative to production. This saves time, increases workflow efficiency, improves communications and reduces overhead. ●

Despite all of the advances in the development of digital workflows, there hasn't been an effective solution available to help organizations that continue to struggle with the challenge of creating simple and efficient approval procedures. Project timelines get held up, requested changes untracked and communication between project participants is difficult or ineffective. Until now.

DALiM ES revolutionizes the way that creative organizations manage projects from start-to-finish with an intuitive, customer-facing environment for fast, efficient online file delivery and approval. ES Online Approval Platform provides a central location for collaborative reviews from anywhere in the world, and includes configurable iPhone and iPad applications. Highly flexible, ES utilizes an industry standard JDF interface, can connect to any compatible MIS system, and is SWOP® certified.

#### **powerful online collaboration and approval platform**

- Visually review, annotate and approve documents online, including high- or low-resolution files
- Zoom, navigate, place virtual notes, take densitometer readings, check production parameters and calibrate output
- Engage distributed teams with collaborative, real-time reviews
- Multi-layer separation enables viewing specific layers
- Dramatically improve communications in the workflow

#### **configurable user management and automation**

- Set users' access levels and approval status for automated, job-based review and approval management

#### **environmentally friendly**

- Paperless and transportation free solution

#### **comprehensive project management**

- Project management application requires no client side software
- Upload files over the web or via intelligent hot folders
- Communicate job status effectively with RSS feed and email notifications
- Customize file meta-data for incredibly fast search and retrieval
- JDF enabled-with real-time version tracking
- Create custom branded corporate sites for approvals or projects

#### **soft-proofing with color management**

- ES features color accurate ICC-based proofs
- Save time, money, and meet deadlines more simply and efficiently by proofing and approving online
