InPress Systems - the Swiss Army Knife for Xinet

Benefits of InPress

If you use Xinet® WebNative® Suite, InPress delivers tools that help you make the most of your digital asset management solution. By helping you strengthen client relationships, expand service offerings, and engage prospective clients, InPress solutions directly contribute to improving your bottom line results.

InPressive

Broaden and Beautify the WebNative User Experience

InPress Systems' InPressive is a customizable skin for Xinet's® WebNative®. As fast as you can make a WebNative® user, you can now create a personalized site for a new or existing customer. InPressive accentuates WebNative's® core features and adds a new layer of functionality and navigation options. InPressive makes you, your company, and your assets look amazing!

Accelerator

Your Online Print Store

InPress Systems' Accelerator turns your WebNative® server into an online print portal and document-ordering solution. With Accelerator, your customers have the tools they need to dynamically create and order customized advertising, marketing, and promotional materials 24 hours a day! Creating localized sales campaign materials has never been easier. Accelerator enables you to expand your business and attract new customers.

InterAct

Order and Deliver Your Assets With Ease

InPress Systems InterAct plugin for Xinet's® WebNative® adds powerful options for delivering digital assets to clients and vendors. Deploy customizable web forms to develop business applications and workflows that include asset requests, administrator notification, review, and authorization. Leverage your server's brute force to deliver digital assets in a variety of ways.

InAlias

User Registration Made Easy

InPress Systems' InAlias plug-in introduces an online user registration process for Xinet's® WebNative®. Forgotten password retrieval, user authentication, and email confirmations with InAlias make WebNative® user creation easy and secure enough for your customers to manage themselves. Maximize the power of your WebNative® server with InAlias. Save time. Make money.

EnRoute

Real-Time Rules-Based Batch Processing for Folders

EnRoute is a serverside solution that watches folder structures and runs custom queries in the Venture database based on schedules or intervals. Located assets can be routed or passed to custom programs. EnRoute writes reports, notifies, and updates the Venture database.
