

Your Energy, *Our Passion*

An aerial photograph of a vast, rectangular green agricultural field, likely corn, with distinct rows of crops. A solid blue horizontal banner is superimposed across the middle of the image. To the right of the field, a portion of a solar farm with rows of blue photovoltaic panels is visible.

INNOVATIVE

Building a sustainable energy future is our passion.
Everything we do is driven by our belief that solar energy
should be prioritized over all other energy generation types.

EXPERIENCED

WHAT WE DO

We design, engineer, finance, install and maintain high-quality solar facilities to bring maximum return on investment. Our installations are backed by a 10-year performance guarantee plus a plan for continuous operations and maintenance.

TRACK RECORD

Blue Oak brings over a decade of experience and an extensive portfolio of 1,000 plus MW of operational solar facilities. Our projects span the Americas, and we have worked with utility companies and permitting agencies in 35 states.

LONGEVITY

Our marquee repeat customers procure substantial savings and new revenue streams from their solar projects. As a financially stable, long-term partner, we are prepared to design, deliver and maintain your solar energy facilities for a lifetime of service.

INNOVATIVE

The elite team of technical professionals at Blue Oak is solely dedicated to the solar industry. The push for continuous improvement in engineering methods and construction standards is part of the company culture.

“Blue Oak Energy sets the standard through its professional communication, high level of integrity, and quality workmanship. We see them as a valuable partner.”

Dean Iwata, Director of Store Development, REI

Customers

Commercial

The most recognizable companies in the world trust Blue Oak Energy to provide solar solutions that improve their bottom line.

Utility

With experience across more than 100 utility scale solar projects 5MW and greater, Blue Oak is a leader in its class.

Government

The federal US Veterans Administration and municipalities, such as Pueblo Water, trust Blue Oak Energy for their solar power solutions.

Education

Schools have a unique solar opportunity and Blue Oak Energy has proven its ability to deliver tested solutions across many districts.

Agribusiness

With more than 20MW installed in the agricultural sector, Blue Oak Energy is the distinct choice for farmers.

EXPERIENCED

We work under some of the most demanding circumstances to plan, interconnect and deliver solar projects across geographies. With more than 1GW operational, there is no substitute for the longevity and experience Blue Oak offers.

SITE ANALYSIS

All solar projects are customized solutions. We evaluate electricity rate structures, electrical consumption patterns, incentives, financing options, site layouts, and overall business goals to arrive at the ideal solution for your business.

Customer Success

REI, the outdoor gear retailer, was looking for a way to install solar across their fleet of retail stores and distribution centers. They needed to achieve a specific Net Present Value for the solar investment.

Blue Oak's Solution

We analyzed their electricity rates, available incentives, rate of stores owned versus leased, and selected 20 sites to start with. Ultimately, we installed solar on 23 locations across eight states and we continue to operate and maintain REI's solar investments today.

DESIGN & ENGINEERING

Blue Oak's engineering team is unmatched because of our multidisciplinary approach and passion for deploying solar facilities. Our civil, structural, and electrical engineering staff members are co-located and work in cross-functional teams to create cohesive, cost effective solutions.

Customer Success

Prologis, the largest industrial Real Estate Investment Trust in the world, hired Blue Oak to design 90MW of solar facilities across 25 warehouse rooftops. They needed to have all of these projects operational in a 36 month period.

Blue Oak's Solution

We partnered with the original structural engineers to design and permit the full portfolio. We also worked closely with the utility company to ensure all interconnections happened smoothly. These projects were operational, on time, and on budget.

INSTALLATION

We mobilize a jobsite with careful intentions to protect all people and property while also delivering a high quality solar facility. We provide our customers with ample communication and information to ensure the final project meets their goals.

Customer Success

Fortinet, the network security company, hired Blue Oak to deliver their solar campus rooftop and carport system. The project had to be completed in the midst of a contracted campus-wide tenant improvement project.

Blue Oak's Solution

We completed the project in record time and worked in limited phases to accommodate other construction activity on the campus.

OPERATIONS & MAINTENANCE

With over a decade of operating and maintaining commercial and utility solar facilities, Blue Oak's service team proactively protects and maximizes our customers' solar investments.

Customer Success

PSEG Solar Source, a division of PSEG the diversified energy company, owns the Shasta Solar Farm. After Blue Oak delivered this facility in 2012, PSEG needed expertise in operating and managing the facility.

Blue Oak's Solution

We provide daily operations and monitoring on this project. Blue Oak also provides a long-term energy production guarantee as part of our warranty.
