STEAM SCENES OF STRATFORD

*Ian
Wilson*

Revisiting a CNR division point and motive power shop

Steam Scenes of Stratford is a 48-page softbound title exclusively devoted to the CNR operations and motive power shop at Stratford, Ontario. This volume replicates the content and narrative style of Ian Wilson's hardcover series on CNR steam operations in Ontario. The photographs in *Steam Scenes of Stratford* span the years 1953 and 1954. They encompass the station, round-house, yard and motive power shop. The volume features 65 previously unpublished black & white images.

There may be future releases similar to *Steam Scenes of Stratford* to follow. These could cover 1950s CNR operations at London, Windsor, Sarnia, Palmerston, Toronto and Belleville. Ian may also consider other railways—especially the CPR—that operated in Ontario.
