

# HSCI STEM CELL SALON

**“Everything You Always Wanted to Know About iPS”**

**Tuesday, November 10, 2009 ~ 4:00 - 5:30 p.m.**

**New Research Building, Third Floor Genetics Dept., Room 350,  
77 Avenue Louis Pasteur, Boston**

**Faculty Hosts:**

*Anthony Rosenzweig, MD (BIDMC)*

*Richard T. Lee, MD (BWH)*

**DISCUSSANTS:**

*Sean M. Wu, MD, PhD (MGH)*

*Konrad Hochedlinger, PhD (MGH)*

*Laurence Daheron, PhD (MGH)*

**Related Technology:**

**HSCI iPS Core Facility**

This is the first of three Stem Cell Salons which HSCI will host in 2009-2010. The others are scheduled for January 26 and March 9, 2010.

The Salons are evolved from the HSCI Inter-labs which were conducted for our community from 2004-2009. In this new endeavor, we seek to embrace a congenial and informal format for sharing the latest scientific insights and challenges from our community. Each topic will be broadly relevant to our diverse community, and we strongly encourage attendees to be active participants in the discussion. In an effort to keep these from being simply 'once and done' events, the proceedings will be synthesized and shared on a community forum in iStem. We hope that the conversations started at the Salons will continue for some time, and that new collaborations may evolve from these sessions.

On November 10th, come hear our guests discuss the challenges of working with iPS technology, and provide insight and advice to the HSCI community on integrating the use of iPS research in your labs.

**Beer, wine and  
light refreshments  
will be provided!**
