Aging: Complex Patterns of Personal Change

Glenda Eoyang, PhD
Human Systems Dynamics Institute
doeoyang@hsdinstute.org

December 4, 2015
Today we’ll explore . . .

» **What** generates energy in the patterns of a complex adaptive system?

» **So what** are those patterns in personal experience of physical, emotional, mental, social change?

» **Now what** can we do to use this information to age gracefully?
What generates energy in a complex adaptive system pattern?

Container sets the boundaries and holds the system together.

An open, permeable, fluid boundary brings in energy and information and releases it into the world.

A closed, impermeable, rigid boundary loses energy to entropy over time.
So what are those patterns in personal experience of physical, emotional, mental, social change?

Container sets the boundaries and holds the system together.

As we age, our boundaries can get less and less permeable and fluid:
- Time
- Physical constraints
- Attention
- Perceived risk
- Financial resources
- And . . .
Difference establishes the tension, which is the potential for change.

Large differences hold more energy.
Multiple differences hold many kinds of energy.
Small or few differences make less energy available for transformation into action.

What generates energy in a complex adaptive system pattern?
So what are those patterns in personal experience of physical, emotional, mental, social change?

Difference establishes the tension, which is the potential for change.

As we age, the differences that make a difference can begin to fade:

- Muscle mass
- Perceptual acuity
- Attention breadth and span
- Emotional states
- And . . .
Exchange creates the flow that turns the potential of difference into actual responsive action.

Flexible, elastic exchanges allow energy to flow. Rigid, persistent exchanges block the flow of energy and encourage stagnation.

**What** generates energy in a complex adaptive system pattern?
So what are those patterns in personal experience of physical, emotional, mental, social change?

Exchange creates the flow that turns the potential of difference into actual responsive action.

As we age, exchanges can be less frequent and less complete:

- Hearing
- Sight
- Physical connections
- Relationships
- And . . .
Now what will help you and your loved ones maintain flexible and fluid containers?
**Now what** will help you and your loved ones sustain and invigorate differences that make a difference?
**Now what** will help you and your loved ones sustain old and engender new exchanges?
Now what for you?

» **What** are the conditions for your energy today?

» **So what** might you do to expand your containers, focus your differences, and feed your exchanges?

» **Now what** is your next wise action to set conditions for happy and healthy personal change?
Today we explored . . .

» **What** generates energy in a complex adaptive system?

» **So what** are those patterns in personal experience of physical, emotional, mental, social change?

» **Now what** can we do to use this information to age gracefully?
Now What?
