2016 Pharmacy EXPO – Exhibitor Summary

APOTEX INC.

Apotex Inc. was founded in 1974, and is the largest Canadian-owned pharmaceutical company. From its 2 employees, 5,000 square foot beginning, the company has grown to employ over 10,000 people in research, development, manufacturing and distribution facilities world-wide. The Canadian operations of the Apotex Group of Companies has over 6,000 employees. Extensive investments in Canadian facilities include over 3 million square feet in manufacturing and R&D facilities in Richmond Hill, Toronto, Etobicoke, Brantford, Windsor and Winnipeg. Apotex produces more than 300 generic pharmaceuticals in approximately 4,000 dosages and formats which, in Canada, are used to fill over 89 million prescriptions a year - the largest amount of any pharmaceutical company in this country.

Today, Apotex is a necessary and trusted member of Canada's healthcare community. The company's pharmaceuticals can be found in virtually every pharmacy and healthcare facility in Canada and are exported to over 115 countries around the globe. Export markets represent an ever growing portion of the total sales. Apotex has also established a presence through subsidiaries, joint ventures or licensing agreements in Australia, Belgium, Czech Republic, Mexico, Netherlands, New Zealand and Poland to name just a few. Healthcare professionals around the world rely on Apotex for quality and value.

Although the company's own business is developing and manufacturing generic pharmaceuticals, the success of Apotex has enabled it to diversify into a number of other health-related areas. The Apotex Pharmaceutical Group of Companies also researches, develops, manufactures and distributes fine chemicals, non-prescription and private label medicines, and disposable plastics for medical use.

The worldwide sales of the Apotex Group of companies exceed $2 billion (Canadian $) per year.

ASTRAZENECA

AstraZeneca is one of only a handful of pure-play biopharmaceutical companies to span the entire value chain of a medicine from discovery, early- and late-stage development to manufacturing and distribution, and the global commercialization of primary care, specialty care-led and specialty care medicines that transform lives.

Our primary focus is on three important areas of healthcare: Cardiovascular and Metabolic disease (CVMD); Oncology; and Respiratory, Inflammation and Autoimmunity (RIA). We are also active in the Infection, Neuroscience and Gastrointestinal (ING) disease areas.

We employ approximately 600 people across the country, including roughly 275 employees at our head office in Mississauga – headquarters for Scientific Affairs, Clinical Research, Finance, Information Services, Corporate Affairs, and Sales and Marketing. These employees work to provide our medicines to more than three million Canadians.

CANADIAN ASSOCIATION OF PROVINCIAL CANCER AGENCIES (CAPCA)

Together, the provincial cancer agencies will achieve the best cancer control for all Canadians by working in harmony and speaking with one voice on common priorities and key issues; and collaborating effectively with partners across the country.

To collectively reduce the burden of cancer by promoting the highest quality of care and services for all Canadians affected by and at risk of cancer.

CAPCA is an inter-provincial organization of provincial/territorial cancer agencies/programs engaged in cancer control. CAPCA supports the reduction of the burden of cancer on Canadians by facilitating and supporting effective leadership, collaboration, communication and advocacy for cancer care and control. Collectively, the members of CAPCA work to reduce the burden of cancer by promoting the highest quality of care and services for all Canadians affected by cancer and at risk of cancer; and implementing the cancer control strategy in their respective provinces.

EMERGENCYID CANADA

Emergency ID offers a totally free Online Datafile, where you can store unlimited information about your health, insurance, emergency contacts - anything you want.

Create a file and have the ID Code engraved on your Emergency ID product, or put it on any other item you want - you don’t even have to buy anything from us!

First responders can access your Datafile through any web-enabled device including tablets and smartphones. There are no fees for using this service. Ever.

We know what we’re doing: At Emergency ID, we have been creating and manufacturing medical ID products in Canada for nearly 20 years. We are proud to design and create fashionable and durable medical ID bracelets and necklaces, as well as other forms of medical ID.

We believe that medical alert ID products should be accessible to everyone who needs them, and therefore keeping our prices affordable is a top priority. This is also why we’ve made our online Datafile free to anyone, regardless of whether or not you buy a product from us.

FERRING PHARMACEUTICALS

Ferring Pharmaceuticals is a research-driven biopharmaceutical company dedicated to researching, developing and marketing innovative treatments in a number of key therapeutic areas including reproductive health, urology, and gastroenterology.

Founded in 1950, Ferring now operates from more than 60 countries and employs more than 5000 people throughout the world, while treatments are available in more than 110 countries.

At its seven R&D centres, Ferring scientists strive to improve existing therapies and to create inventive new treatments that address unmet medical needs and help people of all ages live better. And, in every aspect of our business, we follow the Ferring Philosophy: “People Come First at Ferring”. It’s more than just five simple words. To us, it is a guiding principle that inspires everything we do - from our business practices to our relationships with patients and physicians.

GALDERMA CANADA INC.

Galderma Canada Inc. was established in 1989 as part of a global organization, Galderma S.A. We market prescription products, over-the-counter skin care and aesthetic & corrective solutions within Canada to a range of healthcare professionals, including Dermatologists, General Practitioners, Nurses, Pharmacists, Paediatricians and Plastic Surgeons.

Our philosophy is ethical partnership, and we strive to work closely both with healthcare professionals and patients, to support the development and provision of world-class dermatology services within Canada. A major focus is to be seen as the key educational partner in dermatology, offering high quality, accredited training and support to medical professionals.

Our drive and ambition to have patients and customers at the heart of everything we do means partnering with a variety of Dermatology institutions/associations through to national/independent retailers, pharmacists as well as private dermatology clinics. Our three business units of prescription, over-the-counter skin care and aesthetic & corrective products work in harmony to support lifelong challenges of skin conditions.

GLAXOSMITHKLINE CONSUMER HEALTHCARE

On March 2, 2015 we completed a 3-part transaction with Novartis which reshapes our business.

We have combined our Consumer Healthcare business with Novartis's to create one of the world's largest Consumer Healthcare companies, with number one positions in specialist oral health and over-the-counter (OTC) medicines across 36 markets and leading positions in skin health and family nutrition.

GSK Consumer Healthcare combines our strong pharmaceutical capabilities in regulatory, medical, drug manufacturing, and healthcare professional access - doctors, dentists, pharmacists - with best in class fast moving consumer goods capabilities - consumer insight, speed to market, brand focus and the ability to effectively partner with retailers. We call this combination of pharmaceutical and fast moving consumer goods capabilities 'Fast Moving Consumer Healthcare', and believe we are uniquely placed to become the first and best Fast Moving Consumer Healthcare Company driven by science and values.

GS1 CANADA

Business is easier when you speak the same language as your customers, suppliers and partners.
We all do things our own way. But although these differences help define an organization’s identity, they can cause problems when we work together.

That’s where GS1 can help.
No matter what success looks like for you, being able to identify, capture and share information is vital to achieving it. Our standards provide a common language through which your organization or business can do this.

We work with enterprises of all types and every imaginable size.
And although we believe in healthy competition, in some areas cooperation is more important. That philosophy directs how we’re structured and ensures we work together to agree standards that are right for our members.

HALO METRICS

The name Halo Metrics describes our history in loss prevention, our evolution to merchandising, and the revolution towards protecting the total consumer experience.

The term Halo for our company is based in our roots of loss prevention. Our solutions deliver positive results in the protection of merchandise while allowing customer interaction. A Halo is a positive force that provides protection that you can’t always see. With our solutions Halo makes space for good consumers and protects their experience.

When we suggest a solution we always propose testing to verify the return on your investment. Our solutions have historically provided measurable reduction in shrinkage and/or a lift in sales. Metrics is the key to our future of consumer experience protection. Our goal is to measure “the experience” and then deliver solutions that enhance and protect that experience.

Halo Metrics is a leading provider of retail security solutions that protect the consumer shopping experience. Our security solutions prevent theft while allowing honest shoppers full access to merchandise on display.

In business in Canada since 1988, Halo Metrics has grown to become a leading source for Canadian retailers for merchandising and loss prevention solutions. Our strengths include our infrastructure. We have direct representation in four provinces, Eastern and Western based stocking warehouses, and bi-lingual English and French support. We cover all of Canada and can easily support our National and Regional customers.

HEALTHMARK LTD.

Offering medical and pharmacy products and automation to the Canadian healthcare market for twenty-five years

Since 1990, Healthmark has developed an excellent reputation for providing innovative pharmacy and IV products, as well as systems that offer cost-effectiveness, production efficiencies, safety and ease of use. This reputation has been built on a comprehensive line of products addressing pharmacies (Hospital, Oncology Centres, Retail, Long Term Care, Home Infusion, Compounding and Corrections) needs for unit dose packaging and dispensing as well as intravenous and chemotherapy drug preparation. This has expanded over the years to include automated systems for inventory management, Vial filling/Pill counting, Will-call retrieval, Packaging verification and much more.

Our unique expertise in medication packaging combined with customer demand has enabled us to establish a RePackaging Outsource Production Facility. Our customers drop ship bulk oral meds and we send back custom
labelled unit dose oral liquids in cups, syringes, blister cards, pouches, and more. Recently we have launched our first commercial oral unit dose liquid product.

We continue to acquire new products that offer our clients innovative and safety oriented - cost-effective solutions including a line of latest technology RFID solutions for accurate drug inventory management.

INNOVATION

Our company name categorically sums up our charter as a solutions provider… we’re innovators. We do more than simply manufacture and sell technology. We create new ideas and ways of doing things.

Our founder and chairman, Harry Boyer, drilled into us, “understand the problem.” It’s our own unique brand of root cause analysis. It’s been our motto for decades.

Innovation is an industry leader because we understand the origin and the evolution of pharmacy’s problems, and we collaborate with our customers and industry partners to innovate bona fide solutions.

Our mission is to help pharmacies optimize outcomes, whether it’s patient, process, or technology-related. We strive to make a difference in helping pharmacies increase operational efficiency, enhance patient safety, and deliver patient-facing care.

We’re now taking our mission to another level with the formation of our Advanced Systems Division, which enables our seasoned Professional Services team to work side-by-side with our colleagues at Binghamton University’s
Watson Institute for Systems Excellence (WISE). Through this collaboration, of which Pharmacy Intelligence was developed, we’re blazing new trails to help our customers and the industry at large with improving patients’ quality of life and health outcomes.

MYLAN PHARMACEUTICALS ULC CANADA

Our history, our mission and our values tell the story of who we are as a company. We began as a pharmaceutical distributor, providing products to customers in smaller communities.

Today we’re one of the world’s leading generics and specialty pharmaceutical companies, with products in approximately 165 countries and territories. And our dedication to providing access to medicine continues to grow after more than 50 years.

We’re one of the largest generics and specialty pharmaceutical companies in the world, manufacturing and marketing approximately 1,400 different medicines to retail, wholesale, government and institutional customers.

We apply one global quality standard across our facilities and across our product line . . . regardless of market.

A History of Doing What’s Right
We began in 1961 as a company dedicated to helping people in small West Virginia towns and rural communities gain access to affordable medicine. Today, we remain dedicated to the same mission, but we do it for the world.

One Quality Standard
Medicines and their ingredients can be made in facilities all over the world. We believe in one global quality standard for all medicines. And we passionately support efforts and legislation that bring us all closer to that goal.

PHARMASMART

To be the global leader in hypertension education and management through the delivery of innovative blood pressure technology, services, and patient data management.

The PharmaSmart mission is supported by our team commitment to the following pillars:

Ease of Use
PharmaSmart was founded on the premise that any blood pressure management tool should be easy to use. Approximately 9 out of 10 people will develop hypertension in their lifetime, and it is our goal that all of them will be able to use PharmaSmart technology to track their BP. We are committed to a “one-button” philosophy. No menus, no usernames, no passwords, no hassles.

Accuracy
No PharmaSmart device will be put on the market without an independently published, peer-reviewed clinical accuracy validation. While our device class does not require published accuracy validation, PharmaSmart's accuracy commitment does.

Privacy
Patient confidentiality is a PharmaSmart pillar. PharmaSmart is HIPAA/PIPEDA compliant and does not collect or store any patient names, or personal data.

Connectivity
PharmaSmart offers internet ready Health Screening Kiosk products through 3g/4g, CAT-5 or Wi-Fi. This core technology commitment ensures that all of our clients (and their patients) will have the option to utilize our patented BP Tracker™ patient portal with seamless access to PS DataSmart® the world’s most robust “real-time” BP data repository. PharmaSmart’s unique, internet ready data platform positions PharmaSmart as a world leader in cost-effective screening, management and delivery of BP data between patients and their healthcare providers. PharmaSmart is working with organizations such as Microsoft HealthVault, the Continua Health Alliance, and other leading industry partners to improve the integration and management of health information worldwide.

Program Execution
PharmaSmart recognizes that technology is only half of the equation. Many of our Kiosks are located in retail pharmacies, where our technology is supported by pharmacists and pharmacy techs, among the most trusted of all professionals. PharmaSmart has developed a structured and disciplined program for our retail partners. We work directly with pharmacy staff, providing the tools and training to maximize overall execution and visibility of the PharmaSmart BP program. This commitment to program and execution support enables us to transition pharmacy staff into Experts in Blood Pressure Management, ensuring patient participation, and delivering sustained, long-term results.

PHYSIOCOOL

Physicool produces products based on a medically formulated Coolant. A new rapid cooling mist is the first product to be launched in Canada and is designed to give cooling relief for women suffering from hot flashes, as well as relief from high ambient temperature.

The mist is also effective at calming skin irritation caused by mild burns, bites and stings. Physicool aim to introduce an increasingly wide range of products, including cooling compression bandages and cooling sports clothing. They will be entering a wide range of markets including medical and sports organisations.

Physicool has now become a household name used globally. Our products are used for every-day purposes ranging from the treatment of a sprained ankle, enhancing patient rehabilitation post-surgery to beating the heat of a hot flash. We didn’t start this way. Physicool’s origins stem back to the equine market, Physicool’s sister company Equinice, and a small office on a Dorset farm, England.

Physicool’s rapid evaporation cooling technology was initially used to treat race horses. It wasn’t until we received feedback from jockeys using Physicool to treat their own injuries that we realised the human application. After testing and product development Physicool was born. We shot to UK stardom in 2009 when Kay pitched Physicool on BBC’s Dragon’s Den. On the night of that successful pitch our website received 36,000 visits and global interest.

Today we continue to grow our product offerings with the development of new products and applications. Physicool is dedicated to enabling people to live their lives to the fullest by providing intelligent, forward thinking medical devices and lifestyle products to aid wellbeing and recovery.

PUBLIC HEALTH AGENCY OF CANADA

Mission: To promote and protect the health of Canadians through leadership, partnership, innovation and action in public health.

Vision:
Healthy Canadians and communities in a healthier world.

Values:
- Respect for Democracy
- Respect for People
- Integrity
- Stewardship
- Excellence

Mandate
The role of the Public Health Agency of Canada is to:
- Promote health;
- Prevent and control chronic diseases and injuries;
- Prevent and control infectious diseases;
- Prepare for and respond to public health emergencies;
- Serve as a central point for sharing Canada’s expertise with the rest of the world;
- Apply international research and development to Canada’s public health programs; and
- Strengthen intergovernmental collaboration on public health and facilitate national approaches to public health policy and planning.

REBELS REFINERY

We want our customers to know that we are always looking out for their best interests and providing them with premium products at great prices. We will never try and sell you an $80 anti-aging cream that does nothing more than a basic moisturizer. That’s not what we’re about.

We created a line of natural skin care to get away from the chemical intensive alternatives that are likely doing more damage than good to both your skin (body’s largest organ) and the rest of your body. We know we can go with the highest quality natural ingredients and outperform the synthetic crap pervasive in the industry (most of our products are 99-100% natural and pure gold).

REVLO CANADA INC

Revlon was founded in 1932, by Charles Revson and his brother Joseph, along with a chemist, Charles Lachman, who contributed the "L" in the REVLON name. Starting with a single product - a nail enamel unlike any before it - the three founders pooled their meager resources and developed a unique manufacturing process.

Revlon is a global color cosmetics, hair color, beauty tools, fragrances, skincare, anti-perspirant / deodorants and beauty care products company whose vision is Glamour, Excitement and Innovation through High-quality Products at Affordable Prices. Revlon® is one of the strongest consumer brand franchises in the world. Revlon’s global brand portfolio includes Revlon® color cosmetics, Almay® color cosmetics, SinfulColors® color cosmetics, Pure Ice® color cosmetics, Revlon ColorSilk® hair color, Revlon® beauty tools, Charlie® fragrances, Mitchum® anti-perspirant / deodorants, and Ultima II® and Gatineau® skincare and its products are sold in over 100 countries across six continents. Websites featuring current product and promotional information can be reached at www.revlon.com, www.almay.com and www.mitchum.com.

ROGERS PHARMACY PRACTICE

Pharmacy Practice+ is a smart mix of traditional clinical content and new thinking designed to engage the full spectrum of pharmacists. As our tagline states, our mandate is “Inspiring Canadian pharmacists to be their best.”

More than ever, the business and the profession of pharmacy are inseparably, undeniably intertwined. There cannot be a vital, viable, successful pharmacy business model without optimized, engaged, informed pharmacists. And the professional practice success of today’s pharmacists depends on a healthy pharmacy business that values, optimizes and showcases its pharmacists.

SCRIPTPRO CANADA LTD.

ScriptPro is a technology company founded in 1994. Corporate headquarters are in the Kansas City area.

The company’s initial product, the SP 200 Robotic Prescription Dispensing System, pioneered the use of robotics in community pharmacies.

Today, ScriptPro offers a comprehensive line of over 200 pharmacy automation and management system products that have revolutionized pharmacy operations in the U.S., Canada, and many other countries.

ScriptPro products operate in thousands of independent, chain, hospital, supermarket, and government pharmacies.
• Many large chain pharmacies have standardized operations around the ScriptPro robotic model.
• Leading hospitals in the U.S and around the world use ScriptPro systems to ensure accuracy and patient safety.
• Over 300 Veterans Administration and public health system hospitals rely on ScriptPro robotics-enabled workflow systems to care for their patients.
• The Department of Defense deploys ScriptPro telepharmacy equipment at bases around the world to make pharmacists available wherever needed.

ScriptPro has grown through invention and product development rather than through acquisition. It owns the core technologies utilized, and manufactures, sells, installs, and supports all of its products.

SERVIER CANADA INC.

We are an organisation as well as an international foundation involved in research activities which are focused on further improving health and bringing better care to patients.

Medicines add years to life and life to years as well as offer patients a better quality of life. In most cases, the cost of treating a disease is lower than the cost of not treating and the benefits provided by the treatments are often priceless to patients. This applies to the majority of common chronic diseases such as hypertension or diabetes.

These two diseases can, in fact, lead to severe complications which treatment with drugs can now prevent. This proves that although medicines may represent an immediate cost for the patient and the community, they remain an investment in duration and quality of life.

TARO PHARMACEUTICALS

Established in 1950, Taro Pharmaceutical Industries Ltd. (together with its affiliates “Taro”) is a research-based, global specialty pharmaceutical company that develops, manufactures and markets affordable prescription and over-the-counter pharmaceutical products. Taro specializes in generic products, but also produces private label and branded drugs. Taro’s research programs and niche strategy have enabled the Company to achieve important role in the specialty pharmaceutical sector.

We are a leading manufacturer and supplier of topical dermatological products (such as creams, ointments, and gels) and also have a growing line of solid dosage form products (tablets and capsules). As of December 31, 2011, Taro marketed more than 180 pharmaceutical products in over 20 countries.

Taro customers include wholesalers, drugstore chains, grocery chains, mass volume retailers, healthcare institutions, independent drug stores and discount retailers.

We’re proud that millions of patients rely on our generic pharmaceuticals and over-the-counter products every year. Whether you’re a physician, pharmacist or patient, please consider this website your personal resource for learning more about Taro and our products. We invite you to return to this website often for new products and updates.

TEVA CANADA

Teva is the largest manufacturer of generic drugs in the world, and we are among the world's top 10 pharmaceutical companies.

Here in Canada, Teva makes both generic and brand-name pharmaceuticals. With nearly 200,000* prescriptions filled each day, we understand the shared role of brand-name and generic medications in a sustainable healthcare system.

We offer more than 400 brand and generic medications, to treat everything from ear infections to diabetes, heart disease and cancer. Our proven generic products are easily recognizable through prefixes such as “Novo-,” “ratio-” and “Teva-.”

Because our generic products are priced substantially lower than their brand equivalents, we save Canada's healthcare system more than $3 billion annually.

Teva’s brand-name division, Teva Canada Innovation, is a leader in developing specialty medicines that meet patient needs, most significantly in central nervous system and pain. In Canada, Teva's innovative portfolio includes six leading proprietary drugs:

We're proud to be a major part of Canadian healthcare. We invite you to find out more about us: Explore our long history in Canada, view our facilities and learn about our industry. Here, you will also find the promise of an enriching career in our employment opportunities.

Website:  http://www.tevacanada.com/default.aspx

UNILEVER CANADA

With more than 400 brands focused on health and wellbeing, no company touches so many people’s lives in so many different ways.

Our portfolio ranges from nutritionally balanced foods to indulgent ice creams, affordable soaps, luxurious shampoos and everyday household care products. We produce world-leading brands including Lipton, Knorr, Dove, Axe, Hellmann’s and Omo, alongside trusted local names such as Blue Band, Pureit and Suave.

Responsible business
To embed sustainability into every stage of the life cycle of our products, we’re working with our suppliers to support responsible approaches to agriculture. We’re also learning from NGOs and other organisations, recognising that building a truly sustainable business is not something we can do without expert advice.

We believe that as a business we have a responsibility to our consumers and to the communities in which we have a presence. Around the world we invest in local economies and develop people’s skills inside and outside of Unilever. And through our business and brands, we run a range of programmes to promote hygiene, nutrition, empowerment and environmental awareness.

Impact & innovation
We realise innovation is key to our progress, and through cutting-edge science we’re constantly enhancing our brands, improving their nutritional properties, taste, fragrance, or functionality.

We invest around 1 billion every year in research and development, and have established laboratories around the world where our scientists explore new thinking and techniques, applying their expertise to our products.

Consumer research plays a vital role in this process. Our unrivalled global reach allows us to get closer to consumers in local markets, ensuring we understand their diverse needs and priorities.

About our brands
From long-established names like Lifebuoy, Sunlight and Pond’s to new innovations such as the Pureit affordable water purifier, our range of brands is as diverse as our worldwide consumer base. Unilever has more than 400 brands, 14 of which generate sales in excess of 1 billion a year.

Many of these brands have long-standing, strong social missions, including Lifebuoy’s drive to promote hygiene through handwashing with soap, and Dove’s campaign for real beauty.

UNIVERSITY OF TORONTO- LESLIE DAN FACULTY OF PHARMACY

We are Canada’s largest pharmacy school and have a world class reputation in education and research. Educational programming is at the heart of the Leslie Dan Faculty of Pharmacy and we currently offer a number of cutting-edge educational programs including the PharmD program (entry to practice professional degree program), the PharmD for Pharmacists program (for those who have completed a BScPhm degree and wish to upgrade to an entry level PharmD), and the Pharmaceutical Chemistry Specialist program (BSc), offered in conjunction with the Faculty of Arts and Science. Our Graduate Programs offer students in the physical, biological, clinical and social sciences a challenging and rewarding research-intensive program leading to Master of Science (MSc) and Doctor of Philosophy (PhD) degrees.

The research conducted by students, faculty, research associates and postdoctoral fellows at the Leslie Dan Faculty of Pharmacy focuses on drugs and medications. This research reflects the breadth and depth of the questions and issues relevant to modern drug therapy including the role of pharmacists in the health care system, the mechanism of action of novel compounds, drug discovery and delivery, and countless others. The results of this research have a profound impact in drug therapy on both the molecular level and on entire populations. Current research conducted at the Faculty includes the development of a cost-effective nanomaterial-based diagnostic tool used to identify cancer and infectious disease; the development of a novel drug delivery system to aid wound healing in diabetic patients; and leveraging health care databases to examine the effects of drugs on patient’s health and how resources are used, allowing policy-makers to make better decisions about the delivery of health care.

The Leslie Dan Faculty of Pharmacy is also committed to life-long learning through the Office of Continuous Professional Development which delivers leading-edge educational programs that improve and expand the competency of pharmacy professionals, researchers, scientists and allied professionals involved in pharmacy policy and practice. Our International Pharmacy Graduate program (IPG) is a unique best practices bridging program designed to assist pharmacists educated and trained in countries outside Canada to meet Canadian entry-to-practice standards.

WAMPOLE INC.

A century of success!

Usinelt’s hard to believe that 100 years of success started with Cod Liver Oil. In 1893, Henry K. Wampole and his partners moved production to Perth, Ontario and began manufacturing the popular liver extract. Over a century later, Wampole Brands Inc. is an enduring Canadian success story. Recognized as a Canadian leader in high-quality nutritional and herbal products, the Wampole name is associated with quality and value from coast-to-coast.
Our Promise
Today, consumers are taking greater responsibility for managing their own healthcare. There is a growing interest in disease prevention, nutrition and better management of chronic illnesses. Recognizing that stressful, fast-paced living can compromise nutrition and diet, consumers are embracing the healthy benefits of nutritional supplements and complementary therapies. Wampole is committed to supporting Canadians in the pursuit of total health and wellness.

Quality and innovation
Wampole has a product line that includes a wide range of herbal and nutritional supplements. Our formulas are scientifically based and reflect the most current healthcare research. Strict quality control measures and testing polices ensure the safety and purity of all our products. Now, more than ever, Wampole Brand products make sense. Dedicated to quality, service and value, Wampole is leading the way to a new century of health.
