**K.OA Bobbie Bear's Buttons**

**Task**

Pose this question to the students:

*Bobbie Bear has a box of red and blue buttons. She takes 4 buttons out of the box. How many of each color button might she have?*

After students answer the question, ask them to draw pictures and write the number for each color. Students may represent their solution using drawings, equations, or both. Not all possible pairs that total 4 are required to meet this standard, but students should be encouraged to include more than one.
