

G-CO Inscribing a hexagon in a circle

Task

Let C be a circle with center O and a diameter meeting C in points P and S as shown below:

- With straightedge and compass, show how to find a point Q on C so that triangle OPQ is equilateral.
- Repeating part (a) show how to find points R, T, U on C so that $PQRSTU$ is a regular hexagon.
- Find the area of $PQRSTU$. How does it compare to the area of C ?
