3.NF Jon and Charlie's Run

Task

Jon and Charlie plan to run together. They are arguing about how far to run. Charlie says,

\[ I \text{ run } \frac{3}{6} \text{ of a mile each day.} \]

Jon says,

\[ I \text{ can only run } \frac{1}{2} \text{ of a mile.} \]

If Charlie runs \( \frac{3}{6} \) of a mile and Jon runs \( \frac{1}{2} \) of a mile, explain why it is silly for them to argue. Draw a picture or a number line to support your reasoning.
