

2.7 Telling Time

In this unit students use analog and digital clocks to tell and write time, understanding a.m and p.m.

Understanding and working with time are life skills. In this short unit students build on the work they did in first grade (tell and write time in hours and half-hours), in order to tell time to the nearest five minutes, with both digital and analog clocks. The concept of a.m. and p.m. are also introduced.

An alternative to this unit is to integrate expectations on telling time into other units.
