

# Markers in Boxes

## Task

- Presley has 18 markers. Her teacher gives her three boxes and asks her to put an equal number of markers in each box.
- Anthony has 18 markers. His teacher wants him to put 3 markers in each box until he is out of markers.
  - a. Before you figure out what the students should do, answer these questions:

*What is happening in these two situations? How are they similar? How are they different?*

- b. Figure out how many markers Presley should put in each box. Show your work. Then figure out how many boxes Anthony should fill with markers. Show your work.
