

ROYAL FURNITURE SHOWROOM

KIRBY PROJECT SPOTLIGHT

When the Elwell family decided to build their new state of the art furniture show room and design center, they chose a high quality, custom steel building manufactured by Kirby Building Systems-MS.

Royal Furniture is the newest addition of the family owned and operated brand of high-end furniture stores located in Marathon, Florida Keys. This clear span, 15,000 sf trend-setting structure features two decorative towers, a stucco finish system applied over Dens Glass and Reverse Roll High Rib R Panel, with a Standing Seam 360 roof system. Special engineering was required due to the weight of the towers and 180 mph wind speed requirement.

Royal Furniture and Design is proud to be affiliated with general contractor, Royal Crest Builders, who produced this high quality project, with George Windish as project manager. Designed by Jason Tramonte Architects, and erected by Steel Worx.
