

cut line thru-hole

overall speaker dimensions

cut line thru-hole

9.125"

62FX

Installation requires precise cutout dimensions.  
Please follow the instructions below.

NEW CONSTRUCTION:

Use pre-construction bracket (62FX)  
Verify the bracket is level and aligned per your finished requirements.  
The finished bezel of the product is .375" wide so the drywall contractor should be informed he needs to finish the drywall cleanly to the bracket.

FOR RETROFIT INSTALLATION:

Use template supplied with product for cutout dimensions.  
First scar the cutout dimensions, identified on the template, with a razor blade.  
Second, using a fine tooth saw blade, cut out the wall board carefully maintaining the integrity of the cutout dimensions.

Cut line (thru-hole)                    W 9.125" X H 16.375"  
Overall speaker dimensions    W 9.75" X H 17.125"
