**(4) 1" (25 mm) Beryllium Dome Quad-Array Tweeters**

James Loudspeaker is dedicated to providing the ultimate audio experience to any system, regardless of the application, and the Quartz series is far from an exception. This high-end line of free-standing loudspeakers was designed with the discerning listener in mind, delivering audiophile-quality sound to the highest level of precision. Aesthetically inspired by the beautiful Quartz crystals these non-traditionally shaped speakers attempt to emulate, these attractive pieces are sure to make a great addition to your living space. Rather than try to hide a speaker and deal with the performance ramifications of such a design, why not dress the speaker in an elegant aesthetic to match the high level of performance only a tower speaker can deliver.

The Q48 implements a bi-amped system that includes a satellite portion as well as an internal 12 inch down-firing subwoofer for a truly full-range speaker. The satellite portion contains a three way system using a pair of 8 inch woofers, two 5.25 inch midrange drivers, and the signature James Beryllium quad tweeter array, delivering undistorted and crystal clear audio even at massively high output levels. Capable of handling enormous amounts of power without a hint of distortion, these Q-series masterpieces make either a great start or addition to any high-end audio system.

Not only is the performance stellar, but these fine speakers are built with the finest craftsmanship right here in Napa by our master craftsmen, these beautiful speakers come in a wide variety of premium finishes in any color you like to match your aesthetic preferences, including options for complimentary colors for the unique grille design.

Whether you're looking for a high fidelity 2-channel system or constructing a home theater, the James Loudspeaker Quartz speakers are sure to deliver that unbridled James refined sound you've come to know and love.

**PLEASING TO THE EYE- AMAZING TO THE EAR!**
