

## JRS CLEANING INSTRUCTIONS

### Cleaning JRS Frames and Holders is Easy and Safe for the Environment!

Being Green is important to JRS. That's why we have found a tried and true method to cleaning our frames and holders from smudges, fingerprints, dirt and sticky matter.

Just apply an environmentally safe cleaning product (we use Simple Green) to a soft cloth and rub the entire surface of the frame pre-insert. Use the same method to clean the inside masonite and backer plate. Once an insert is placed into the frame, you can clean the aluminum of the frame using the same method. No thinners or harsh chemicals are to be used on any JRS products as they will cause damage.

Note – JRS is not affiliated with and does not receive any compensation from Simple Green Products and provides this recommendation only as a courtesy to our customers. Please visit [www.simplegreen.com](http://www.simplegreen.com) for more info.
