

Important!!!

Please read all instructions before proceeding

3 in 1 Memo Board with loose piece of sublimatable steel

The sublimatable steel piece is **4 7/8" HIGH by 4 3/8" WIDE**. Please keep these dimensions in mind when sublimating your image.

To prepare your memo board, run the enclosed plastic knife along the seam between the cardboard back and the foam border, prying the foam gently away from the cardboard. Once done, wedge your sublimated insert in place and glue if necessary. Repeat on other side.
