

vessels. It is very likely that the present activity among Wisconsin students will lead to the restoration of a number of other vessels. We may, therefore, in the near future reasonably expect a very considerable addition to our records.

#### THE LIST.

18. A very large and handsome vessel, restored from 450 fragments obtained at Dykesville, in Brown County. (Sec. 13, T. 25, R. 22 E.) Its capacity is a little over two bushels.

It measures 20 inches in height, 15 inches across the opening at the top and 22 inches in diameter at the body. It is the property of Mr. J. P. Schumacher, of Green Bay.

This is the largest known example of Wisconsin aboriginal earthenware.

19. A vessel recently restored from fragments obtained on the Sheboygan village sites.

It is very narrow, with a vertical rim and conical base. The walls are rude and thick and of a yellowish-brown color. The dimensions are: height, 11 inches; diameter at the top,  $7\frac{1}{2}$  inches. It is in the Rudolph Kuehne collection at Sheboygan. (See Frontispiece.)

20. Is in the same cabinet.

"It is of lenticular, flask-like shape, surmounted by the head of an effigy, probably intended to represent a turtle. The opening of this vessel is circular, about  $1\frac{1}{2}$  inches in diameter, and is situated back of the head. There are incised ornamental lines along the border. The material is of a dark gray color and shell-tempered. The measurements are: height, 3 inches; diameter,  $4\frac{1}{4}$  inches." As far as the writer has been able to ascertain, this is the only specimen of its kind found in the state. It was obtained with a gravel-pit burial at Silica, Fond du Lac county.

21. This vessel has a body of a globular shape, with a polished surface and an undulate expanding rim. It is made of a black shell-tempered material, and is ornamented at the shoulder with a zigzag pattern of incised lines.

The measurements are: height,  $4\frac{1}{2}$  inches; rim diameter, 3 inches, and extreme diameter of body, 6 inches. It is the property of Mr. John Gerend, of Sheboygan.

It was obtained from the same locality as the vessel just described.
