

New London by land, and twenty-five by the river. It is eighteen miles from Appleton, with a good road except a few miles near Shiocton. This part of the road is about to be made good, and then the village will be united to the rest of mankind. It is five miles from Shiocton to Stevensville, thirty-one to Oshkosh, twenty-five to Shawano, and two and a half to Shioc Mills. There are some eight or ten buildings, with ten families in the village, and forty within two miles. A steam saw-mill is to be put in operation this fall, when, with a supply of building material, the town will rapidly increase. The river banks are excellent on both sides, not subject to overflow in the highest water, and with a landing at any stage, for some half mile on either side. In low water, steamboats can reach Shiocton in four hours, from New London. We are encouraged to hope, that a steamboat will run up to the village soon.

In respect to location, Shiocton is unusually favored. Surrounded by an extensive body of the very best of farming land, and with the pineries close at hand, and capital seeking a safe investment with a sure prospect of success, the future looks bright for this village.
