LEXUS VISIONARY ANTICIPATION

Creating extraordinary and captivating experiences in the present begins by anticipating the needs and desires of the future. We seek to change the world with innovative experiences that are as unique and exciting as they are unexpected and memorable.

Performance will be transformed into passion, function into emotion and technology into imagination. It is this bold vision that sets us apart, but, more than anything, it is what inspires us.

BRAVE DESIGN

Above all else, brave design is about the courage to stand out. That has always meant doing things differently. Conformity isn't an option. Brave design is what elevates the simple and purposeful to something extraordinary. We see every design as a fresh opportunity to stir a visceral feeling in you. That's why we seek the provocative and welcome the original. It's what drives us to be first. Leading-edge design that inspires more deeply demands nothing less.

EXHILARATING PERFORMANCE

The real measure of exhilarating performance runs much deeper than a list of impressive performance statistics. We believe exhilaration is defined by an undeniable sense of anticipation and the rush of adrenaline. It's about feeling completely connected to the driving experience. So much so that you are beyond distraction because you are absorbed in the intensity of the moment. Nothing compares. When we ignite this sense of passion in you, we know we have succeeded. When you're exhilarated, you can rest assured, we are, too.

IMAGINATIVE TECHNOLOGY

We seek technology that reaches beyond the comfort of the conventional and the safety of the familiar. Intuitive and purposeful are merely starting points. Truly imaginative technology solves problems no one has yet identified. This passion is what propels us to ask, 'What if?' and, 'Why not?' Sometimes the technological breakthrough is revolutionary. Other times it is an unexpected application of an existing one. Either way, the result is an immersive experiences no one imagined possible before.

TAKUMI CRAFTSMANSHIP

At Lexus, the Takumi are the rarified group of master craftsmen who bring a refined human touch to every aspect of our design and development. From the finish of the paint, to the resonance of the engine, their highly-tuned senses of sight, hearing and touch are crucial to perfecting the fit, finish and feel of every Lexus. The Takumi's influence reaches far beyond our enviable quality standards. Their dedication to excellence and passion for constant improvement inspire how we approach everything we do.

OMOTENASHI

The Japanese tradition of Omotenashi is an essential part of Lexus culture. By actively seeking a deeper, more profound understanding of your personal needs and desires, we are able to not only anticipate your expectations but also to exceed them. Often before you realize you even have them. We are dedicated to treating you like a Guest in our home with warmth, care and, above all, respect. This same philosophy is also at the heart of our approach to engineering and design. By anticipating your needs, we can forge a stronger, more meaningful connection between you and your vehicle.

ES/ESh

AN EXPRESSION OF REFINEMENT.

For Lexus, accepting anything but top-quality for the ES 350 and 300h is unacceptable. Behind its notable front fascia, the sleek, whisper-quiet cabin is fully immersed in the Takumi handstitched craftsmanship. With performance to match, compromise isn't in its lexicon. The ES is more than just an expression of Lexus, it defines everything we stand for.

ES/ES3

PERFORMANCE

AN EXPRESSION OF COMMANDING PERFORMANCE.

Behind the lustre of progressive design lies a true luxury sedan focused on the power and spaciousness needed to meld genuine comfort with impressive style. The 268 hp 3.5-litre V6 makes the ES 350 responsive no matter the situation. But why be amazing in just one way? With Normal, ECO and Sport driving styles to choose from, your desired balance of refinement, performance and fuel efficiency is right in the palm of your hands. With its aerodynamic body, the ES offers uncompromising stability and a composed driving feel to deliver a sharp departure from the expected.

AN EXPRESSION OF STRIKING PRESENCE.

The striking form of the signature spindle grille is a defining feature of the ES 350's presence. Every curve delivers a luxurious and aerodynamic on-road experience, meaning your eye-catching style is practically invisible to the wind. The lower, sportier profile adds daring elements that still manage an authoritative and composed look overall. Finally, a luxury sedan that is unafraid to show some muscle.

ES/ES3

INTERIOR DESIGN

AN EXPRESSION OF UNCOMPROMISING LUXURY.

Meticulous craftsmanship is only the beginning when you step inside the ES 350. Take hold of the sporty steering wheel, revel in the superior feel of comfort, and engage in uncompromising luxury. With a cockpit that puts navigation and entertainment at your fingertips, staying connected has never been easier or more enjoyable. Every detail has been given the attention it deserves to create a familiar atmosphere that remains boldly distinct.

AN EXPRESSION OF PEACE OF MIND.

The ES lavishes with innovative comforts, but it also surrounds you with cutting-edge safety technologies. Our virtual senses add to yours as comprehensive available safety features like Vehicle Stability Control,¹⁰ Blind Spot Monitor,⁶ and Rear Cross-Traffic Alert²⁴ give you the utmost confidence behind the wheel. And with Lexus Safety System+ as standard, a suite of intelligent sensors helps keep you protected as you focus on the road ahead.

ES

HYBRID

AN EXPRESSION OF EFFICIENCY.

Lexus is the defiant innovator of hybrid technology, and the ES Hybrid is proof of that mastery. Seamlessly weaving power and efficiency, its impressive 200 net system horsepower¹⁶ produces nearly 70% fewer smog-forming emissions than comparable gas engines.² One of our most advanced and efficient hybrid systems to date, the ES hybrid offers exquisite comforts and unparalleled reliability that can only come from a Lexus.

HYBRID

Standard Luxury

LUXURY AND CONVENIENCE

WARRANTY & SERVICES

SERVICE COMMITMENT

On top of enjoying the highest quality product, Lexus also delivers through a professional Dealer network, a unique and uncompromising level of after-sales service. First Class Service Concept. The highest level of professionalism and vehicle support ensure that Lexus ownership experience is as luxurious as the vehicles.

WARRANTY

Our Lexus Warranty Comprehensive Coverage includes:
48 months/80,000 km

Service Replacement Parts Warranty

24 months/40,000 km
Applicable to Lexus Genuine Parts installed by a Lexus Dealer on a Lexus vehicle or purchased over the counter.

Hybrid-Related Components

96 months/160,000 km
(applies to battery control module, hybrid vehicle control module, hybrid battery and the inverter/converter)

Powertrain

72 months/110,000 km

Corrosion Perforation

72 months/unlimited kilometres

Major Emission Control Components

96 months/130,000 km

Please see your Lexus Dealer for details. Lexus will even provide five days of alternate transportation if your vehicle is required to stay at the dealership for an extended period of time due to a warrantable condition.

EXTRA CARE PROTECTION

Extend beyond the new vehicle warranty and enhance your peace of mind with Lexus Extra Care Protection.

ROADSIDE ASSISTANCE

As a proud owner of a Lexus vehicle you won't have to worry about obtaining assistance when mishaps requiring Emergency Roadside Service or Mechanical Breakdown Towing are needed. Throughout Canada and the continental U.S., our Central Emergency Roadside Services Operator will always be there to ensure you receive prompt, efficient services from one of the many facilities qualified under our approved Roadside Assistance Program. Twenty-four hours a day, 365 days a year we will be there to help.

LEXUS FINANCIAL SERVICES

Come talk to the experts whose exclusive business is financing and leasing Lexus vehicles. You'll find our interest rates fully competitive and our terms flexible – up to 72 months. Our online services conveniently allow you to confirm current rates and receive your credit approval in advance of selecting the Lexus that's right for you. For help, visit your Lexus Dealer or lexus.ca, or call 1-800-26-LEXUS.

LEXUS CANADA

Every effort has been made to ensure the specifications and equipment shown are accurate based on information available at time of printing. In some cases, certain changes in standard equipment, options or product delays may occur, which would not be reflected in this brochure. Lexus Canada reserves the right to make these changes without notice or obligation. Some of the photography in this brochure features U.S. or overseas models, shown with optional equipment that may not be available in Canada. Your Lexus Dealer is the best source for up-to-date information.

Vehicles in this brochure shown with optional equipment. Some features mentioned and/or shown in this brochure may only be available as part of an optional package. Under very cold conditions, the operation of some vehicle electronic systems using liquid crystal technology (such as CD, DVD, NAV and Audio displays) may be adversely affected until a warmer interior vehicle temperature is reached. Lexus reminds you to place small children in CSA-approved car seats – in the rear seats, to always wear your seatbelts, and to drive safely. **1.** Ratings achieved using the required premium unleaded gasoline with an octane rating of 91 or higher. **2.** The Lexus Hybrids have nearly 70% fewer smog-forming emissions compared against similarly equipped conventional gasoline power vehicles. Based on North American sales data and Federal Tier 2 engine emission requirements. **3.** Fuel efficiency estimates were determined using approved Government of Canada Test Methods. Actual fuel consumption will vary based on driving habits and other factors. **4.** The SmartAccess system may interfere with some pacemakers or cardiac defibrillators. If you have one of these medical devices, please talk to your doctor to see if you should deactivate this system. **5.** The backup camera does not provide a comprehensive view of the rear area of the vehicle. You should also look around outside your vehicle and use your mirrors to confirm rearward clearance. **6.** Do not rely exclusively on the Blind Spot Monitor System to determine if a lane change is safe. Always look over your shoulder and use your turn signal before changing lanes. There are severe limits to the function, detection range and clarity of the monitor system. For a complete list of limitations and directions regarding use of the monitor system, please see your Owner's Manual. **7.** Dynamic/Radar Cruise Control was designed to assist the driver and is not a substitute for safe and attentive driving practices. Please see your Owner's Manual for important cautions and instructions. **8.** Mark Levinson is a registered trademark of Harman International Industries Inc. **9.** All Lexus vehicles shown in this brochure have Supplemental Restraint Systems (SRS). For important safety information about the Supplemental Restraint System in a particular vehicle, please see the Owner's Manual or contact your local Lexus Dealer. **10.** Vehicle Stability Control (VSC) and if applicable Vehicle Dynamics Integrated Management (VDIM) are electronic systems designed to help the driver maintain vehicle control under adverse conditions. They are not substitutes for safe driving practices. Factors including speed, road conditions and driver steering input can all affect whether VSC and VDIM will be effective in preventing a loss of control. Please see your Owner's Manual for further details. **11.** Brake Assist is designed to help the driver take full advantage of the benefits of ABS. It is not a substitute for safe driving practices. Braking effectiveness also depends on proper brake-system maintenance and tire and road conditions. **12.** Lexus tests certain Bluetooth® capable phones for compatibility with Lexus vehicles. Please see your Lexus Dealer for details. Note that the recommendation of Lexus is not a warranty of the performance for any phone and that some problems may occur with any type of handset based on the phone software version or the service coverage available in your area. **13.** Functioning Satellite Radio requires a monthly service fee. Please see your Lexus Dealer for further details. Reception of satellite signal may vary depending on location. **14.** The Lexus Tire Pressure Monitor System alerts the driver when tire pressure is critically low. For optimal tire wear and performance, tire pressure should be checked regularly with a gauge. Do not rely solely on the monitor system. Please see your Owner's Manual for details. **15.** iPod/iPhone is a registered trademark of Apple Inc. **16.** Maximum output indicates engine plus HV battery output. **17.** All the airbag ("AB") systems are Supplemental Restraint Systems. All ABs (if installed) are designed to inflate only under certain conditions and in certain types of severe collisions: frontal and knee ABs typically inflate in frontal collisions; side and side curtain ABs in side collisions; Roll-Sensing Curtain ABs at a severe tilt degree, roll or lateral G-force. In all other accidents, the ABs will not inflate. To decrease the risk of injury from an inflating AB, always wear seatbelts. Do not use a rearward-facing child seat in any front passenger seat. Please see your Owner's Manual for further information/warnings. **18.** Smart Stop Technology operates only in the event of certain simultaneous brake and gas pedal applications. When engaged, the system will reduce engine power to help the brakes to bring the vehicle to a stop. Factors including speed, road conditions, driver input can all impact stopping distance. Smart Stop Technology is not a substitute for safe and attentive driving and does not guarantee instant stopping. Please see your Owner's Manual for further details. **19.** HomeLink is a registered trademark of Johnson Controls. **20.** Continuous average power, all channels driven, at less than 0.1% THD; 20-20,000 Hz. **21.** Active headrests can help reduce the extent of whiplash in certain types of rear-end collisions. **22.** The Navigation System is designed to assist in locating an address or point of interest. Discrepancies may be encountered between the system and your actual location. Road system changes may affect the accuracy of the information provided. Rely on your common sense to decide whether to follow a specified route. Detailed coverage not available for every city or roadway. Periodic updates available at an additional cost. See your Navigation System Owner's Manual for further details. Navigational systems in some vehicles are available with bilingual capability. **23.** A single disc DVD player is standard on vehicles equipped with the dual-screen Rear-Seat Entertainment System. A separate DVD player or game system utilizing the centre console's video/audio inputs is required in order to use the split-screen function. **24.** Do not rely exclusively on the Rear Cross-Traffic Alert System. There are limitations to the function, detection and range of the system. You should also look around outside your vehicle, over your shoulder and use your mirrors to confirm rearward clearance. For a complete list of limitations and directions, please see your Owner's Manual. **25.** Lane Departure Alert is designed to read the lane markers of certain roads. If the vehicle approaches the outer limits of its lane, the system warns the driver that corrective action may be required. It is not a collision-avoidance system and is not a substitute for safe and attentive driving. System effectiveness depends on many factors. Please see your Owner's Manual for further information. **26.** The Pre-collision System is designed to help reduce the crash speed and damage in certain frontal collisions only. It is not a collision avoidance system and is not a substitute for safe and attentive driving. System effectiveness depends on many factors, such as speed, driver input and road conditions. Please see your Owner's Manual for further information. **27.** Automatic high beam feature can help improve vision at night. However, conditions such as a dirty windshield, rapidly changing light conditions or hilly terrain will limit effectiveness so the driver may need to manually adjust the highbeams from on to off. Please see your Owner's Manual for details.
