

# LookBooth Style Guide

**Submitting photos for LookBooth Twitter**

# Taking Photos

Capture the model using a camera or screenshot within the VRChat client. The goal is to invoke realism, so use moderate angles

Tall and square format images preferred

We'll choose 1-3 of the photos you send us to post.

Connect your photos.  
A series should feel like they were taken in the same location, or at least the same time of day.

One photo in your series must offer an unobstructed head to toe view of the outfit.

Use your other shots for flattering portrait photos, or close-ups of outfit details.

@OkGoldVR

## Posing for Photos

Real world street fashion covers a wide variety of extremes and concepts. All outfits will be considered, but those suiting a public setting will be preferred.

Models should be aware of the camera, even if not facing it directly. Photos where the subject is interacting with the scenery are especially tasteful

DANG

# Submitting Photos

DM your submission to the @LookBooth twitter for consideration

Send photos if you'd like us to create the post.

Alternatively, link a tweet if you'd like us to retweet your post.

Please volunteer any additional information you'd like included in the post.
