

PV Three-phase Heavy Series Vacuum

Model: PV40

Picture	Description and application
	<p>Three phases can work continuously. Cyclone separator, special star filter and industrial bypass vacuum pump ensures powerful suction and excellent filtering result.</p> <p>Compact design, large wheel, easy to move. Hepa filter is optional according to your needs.</p> <p>Apply to machinery, electronics, ceramics, pharmacy and chemical industry and can be equipped for production line to improve working efficiency and save cost.</p>

Accessory	Technical parameters	
Aluminum connection mouth, diameter 63 mm	Voltage	380V 50HZ
	power	4kw
	Max. vacuum	26kpa
	Airflow	306m ³ /h
	Weight	126kg
	Noise	72dB(A)
	Capacity	55L
	Filter Area	2.85 m ²
	Filter-cleaning way	Manually
	Suction Caliber	63mm
Dimension(mm)	1060*640*1400	

Features

- 1, Switch: France Schneider with leakage, phase and overload protection.
2. With relief protection device.
3. Equipped with cyclone separator.
4. Large screen star filter, its bag area of over 2.85 square meters, made of polyester fabric, filtration precision of 3 microns.
5. Equipped with large polyurethane casters, and with two brakes.
6. Manually filter cleaning.
7. Rapid type loading and unloading dust collector, capacity 55L.
- 8.. With the vacuum indicator.
9. HEPA filter can choose, filtration precision of 0.3 micron filtration efficiency 99.99%.
