

Haian Baixie Forging Hammer Co.,Ltd, found in 1954, is a professional manufacturer for forging industry. We have been making the PLC fully hydraulic die forging hammers since 2002. With the features of energy saving, environmental protection, high accuracy and reliability. Baixie's hammers become more and more popular. The forging hammers are widely applied in producing automobile parts, motorcycle parts, hydraulic tubes, hardwares, surgical instruments, hand-tools, stainless steel tableware, spaceflight industry; they are also the ideal equipment of manufacturing abnormal parts, such as, connecting rods, bend axes, rockers, fork, stainless steel knives and forks to forge and form precisely, and at the same time the die forging hammers can be operated with robots to realize automation.

This photo is about a part of our company.

Now,we have large capacity equipment, such as crane with the capacity of 100T/32T, the floor type boring and milling machine based on T6920 (8000×5000×2400) and on T6916 (5000×4000×1500).

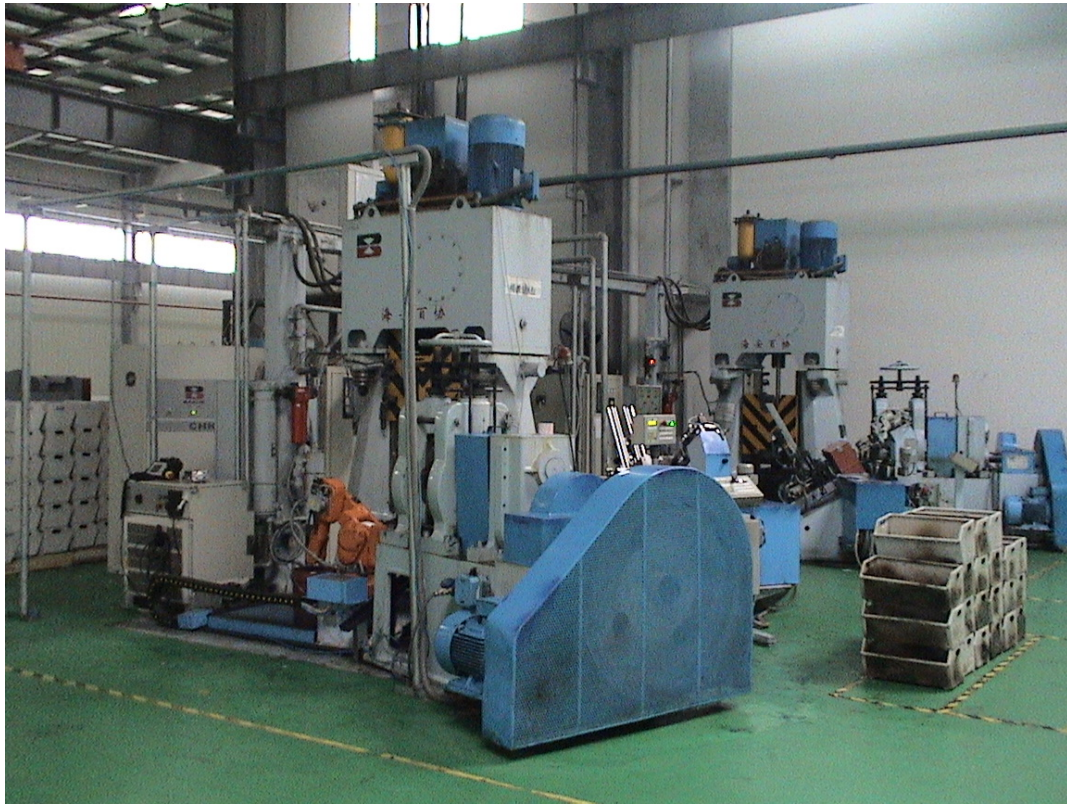

These two photos are about the assembly scenes in our company.

Five sets of CHK fully hydraulic die forging hammers used in one of our customers' company. This customer purchased five sets hammers successively from 2003 to 2007.

CHK 25 PLC fully hydraulic die forging hammer used in a company in Russia. And we also exported three hammers to Vietnam (two of the forging hammers were bought by a German who invested in Vietnam) and one hammer to Syria, and many investors from all over the world bought the forging hammers to invest in China.

These are two automatic forging lines which are invested by an American in Suzhou, China. They use these two forging lines to produce tablewares.

The three forging lines are used to produce surgical instruments. These three hammers are all CHK16 PLC fully hydraulic die forging hammers

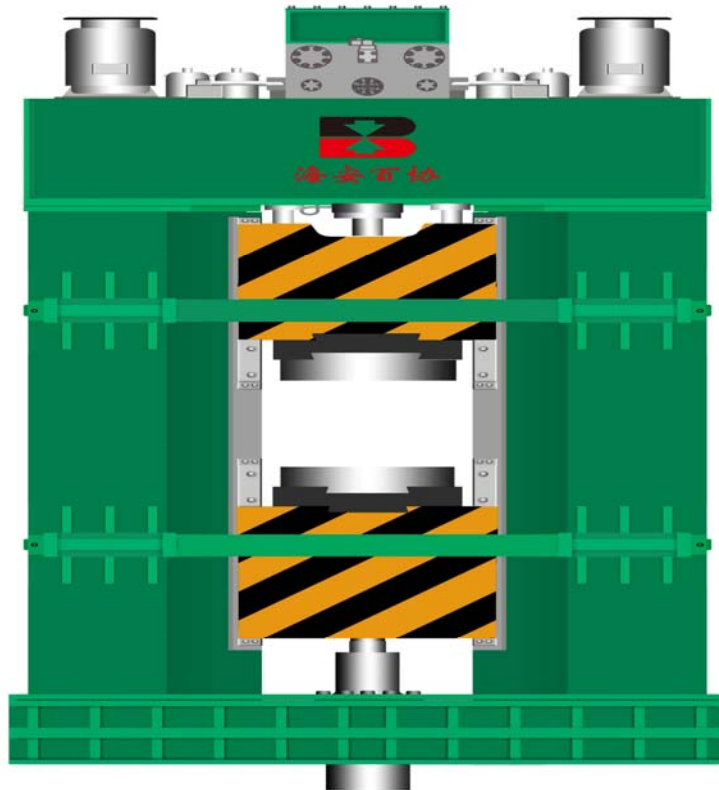

We helped one customer to change the air hammer to fully hydraulic hammer, this is the CTK125 PLC fully hydraulic die forging hammer which was innovated.

CTK 250kJ (10T) PLC fully hydraulic die forging hammer (change the old hammer to fully hydraulic forging hammer) is in use.

CDK PLC hydraulic counterblow hammer with micro-motion of hammer body is used in one of our customers' company.

And now we are doing our best to develop the forging hammers with large capacity.
If you are interested in our company and produces, please don't hesitate to contact us.
