Description Drilling of 200 mm Ø pilot hole and reaming to 450 mm borehole by rotary drilling method (preferably with down the hole hammer method of drilling). The borehole shall be lined with 200 mm nominal diameter steel casing and 200 mm nominal diameter stainless steel screens. The well shall be developed by high velocity water jetting, surging and bailing and airlifting methods to ensure sand free and efficient well performance. Step drawdown and continuous constant discharge rate pumping tests shall be performed to determine well performance and hydraulic characteristics of the aquifer.
