

January 6, 2020

Presents:

Silver's Comments

Soybean futures closed higher today while corn and wheat closed lower. Markets tried to find some stability after Friday's sharp losses. Tensions in the Mideast have escalated but the "shock" to grain commodities has abated somewhat. Commodity funds were net sellers of 4k corn and 3k wheat contracts and net buyers of 4k soybean contracts. The CFTC COT report (delayed because of the holiday) will be released later this afternoon.

Take a few minutes to read page 2 about the Phase 1 US/China deal.

USDA will release major reports this Friday 1/10/20. The final 2019 Crop Production, January WASDE, and Quarterly Grain Stocks reports will be released at noon. We will see numerous private estimates this week.

The following was excerpted from Midday Commentary from FCStone

Monday January 6, 2020

Gregg Doud, the U.S. Chief Agricultural Negotiator, commented on the phase-one trade deal with China in an interview with Agri Pulse. Doud emphasized that China committed to purchase \$32 billion in agricultural products over two years above the baseline 2017 level of 24 billion per year. We will probably see it split a little heavier in 2021 than 2020. Some details of the 86-page agreement are expected to be released at signing on January 15, but while there are specific commitments for specific commodities, we should not expect those details to be made public. Look for China to purchase a wide range of products to meet the requirement, including pet food, fruits and vegetables, almonds, ethanol and dried distillers' grains and solubles. That last comment should be good for domestic corn demand.

China purchased \$124 billion in ag products globally in 2018. This agreement asks China to purchase \$40 billion of that total from the United States. Doud emphasized that people arguing that \$40 billion per year is too lofty do not understand the structural changes included in the agreement on non-tariff barriers, such as phytosanitary and sanitary rules. The compliance language in the agreement provides an enforcement mechanism matching the quantity or value of the product not being complied with. Doud believes that it will take several months before we should see significant change, due to the time it takes to adjust procedures and processes. He thinks "things will look very different" by the middle of this year due to trade agreements with China, Japan and USMCA, and he thinks people will be surprised at the specificity and complexity of the agreement details, emphasizing that his Chinese counterparts were extremely professional in their approach to the talks.

Soybean export shipments continue to disappoint, as shown in the graphic below, but the oilseed corrected higher after sharp losses on Friday. The hard wheat markets were also higher today, while Chicago corn and wheat both posted modest losses as traders focus on Friday's USDA crop reports. Cattle futures lead the meat sector higher on stronger demand expectations.
