

June 2, 2020

Corn and soybean futures closed higher today while soybeans closed lower.

Corn values holding near unchanged for most of the session. NASS confirmed corn usage for fuel ethanol fell sharply in April. According to the report corn usage dropped to 245 mbu vs 371.5 mbu a month earlier and vs 440 mbu LY. MYTD usage is 3.422 bln bushels vs 3.627 bln a year ago. US crop progress numbers show a crop that is nearly done and ahead of the averages. NASS reports the US is 93% complete, just 1 point behind weekly expectations, and 4 points ahead of average.

Soybeans rallied with the confirmation that China bought at least 2 cargoes of US soybeans yesterday. The USDA announced a flash sale of 132 tmt of soybeans for the 20/21 crop year. The US has the advantage over Brazil for Aug and forward.

Weather maps show all three morning model ensembles for the U.S. for the next five days, clearly showing one single trend - serious heat.

Each Thursday I do market analysis for Hoosier AgToday (HAT)
