

June 23, 2020

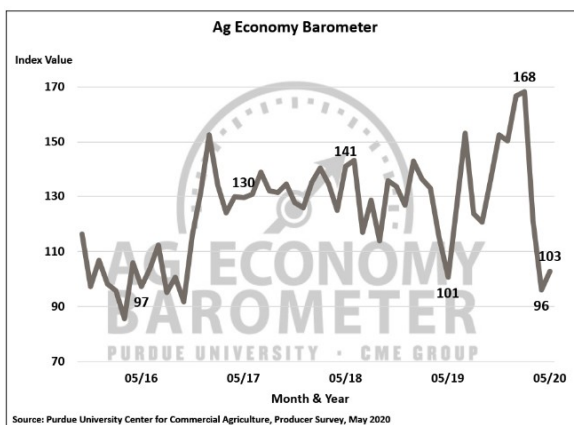

Crop development beneficial rains fell over much of Indiana and the Midwest in the last 24 hours and additional rainfall is forecast in the midrange forecast. Above average temperatures are also included in the forecasts. Unfortunately the rains have had a negative impact on prices. On the charts corn has broken the uptrend line.

USDA did announce a 132k mt soybean sale to China in the 20/21 crop year. There was chatter in newswires today citing skepticism on China living up to Phase 1 agreement terms.

Funds were net sellers of 10k corn and 2k soybean contracts and buyers of 1 k wheat contracts.

[US weather forecasts](#) show heat in the short term with some rain forecast.
