

Wednesday February 10, 2021

Helpful Hint: Click the hyperlinks for more detail.

Grains closed lower today in a "profit taking" trading atmosphere. Funds were net sellers of 40k corn, 30k soybean and 12k wheat contracts. Corn continued to react to the higher than estimated ending stocks numbers in yesterday's WASDE report. The session did kick off with a cancellation of 132 tmt of corn to unknown, whether that was originally going to become China destination isn't known but it did shift sentiment for the session.

Weekly ethanol production remains generally steady with the EIA reporting only 1K bpd increase to 937 Stocks dropped off 520 tb to 23796. MYTD production is running 8.5% behind last year. Weekly production is 9.3% below a week ago. Production is also tracking short of even 2015 as the graph shows below. Stocks are 2.4% below last year and 12.5% above that of 2015. The misalignment between small production and big stocks continues casting a negative light on fuel demand.

Spring Crop Insurance prices are being determined during February.
