

GROWER 360 AVAILABLE NOW

Anton Coop has added a new and exciting feature to our accounting system for the benefit of our customers. “GROWER 360” This is a web based application available on smart phones, tablets and computers. It starts with an invitation from our office coming to your e’mail. Upon setting up your password you will login your account. You will be able to view your account activity for several years back as well as current information. You will be able to view all invoices, scale tickets, bookings and payments posted to your account. Soon you will have the ability to receive and view your statements online; purchase contracts and grain settlements. This will bring information about your business with the Anton Coop timely and efficiently and give you the ability to see it at your convenience. Soon we will also be able to send you notifications through this System. Our team is excited to bring this to our customers and enhance our presence in your operation.
