

2020-2021 Wheat Discount Policy

Moisture

1.8% per point of moisture over 13.5%.

Each load will stand on its own. Loads 16% moisture or higher may be subject to rejection. Please call ahead if delivering wheat 16% or higher for us to check availability to handle it.

Dockage & Foreign Material

Dockage and foreign material (combined value) will be deducted by weight on each load, and a monetary discount will apply for loads with 1% dockage & foreign material or higher. (See table below) Foreign Matter such as Rye, Triticale, and grains other than wheat are considered FM, and any amounts found may be subject to rejection. If able to dump, sample will be sent to get official grades and the FM value will be added with the dockage to determine the final value of discounts to apply.
