SCHEDULE YOUR GRID SAMPLING!

Enroll your field(s) by 10/30/20
for an early sign-up discount of:

\$1/Acre Off

What are the benefits of grid sampling?

- Prevent fertilizer application in areas with high nutrient levels, often resulting in fertilizer savings
- Apply adequate amounts of fertilizer in areas with low nutrient levels, often resulting in yield increases

What nutrients are tested?

- pH, Buffer pH, Sum of Cations (CEC), Base Saturation (%), Soluble Salts, Organic Matter, Nitrate-Nitrogen, Phosphorus, Potassium, Calcium, Magnesium, Sodium, Sulfur, Zinc, Iron, Manganese, Copper
- Specific nutrients can be added upon request
