

## 2019 HARVEST

Butterfield & Associates Grain, Inc. will offer reduced storage rates and corn moisture discounts for 2019 harvest.

Corn and soybean storage will be free for 10 days, then a 10 cent minimum, which will cover 2 months, followed by 3 cents per bushel per month. These storage rates will be pro-rated daily.

We offer deferred payment, as well as off-farm pick up of grain.

Forward contracts are available, as well as free deferred pricing for 30 days. (You cannot roll deferred pricing into storage – it must be priced within 30 days.)

Corn maximum moisture will be 20% for purchase and 18% for storage. Maximum soybean storage is 14%.

Storage will be first come, first serve, with no reservations. We will do our best to accommodate your needs.

Aflatoxin testing will be available.

Have a safe harvest!
