

# Chandler Feed Co.

Wednesday April 17<sup>th</sup> at 11:30 AM in Chandler  
Chandler Community Center, 330 Carlton Street  
Dinner will be provided

## The Role of Mineral Nutrition in Cow/Calf Nutrition. Dr. Chad Zehnder, Field Nutritionist Purina Animal Nutrition.

You will enjoy Chad's practical approach to Cow Calf mineral nutrition. Chad's combination of professional knowledge and practical experience allows him to relate to today's producers and their challenges. Chad will be discussing the importance of cow/calf mineral nutrition and helping make sense of some of the many options you have when you look for the best product for your cow herd.

## Fly Control in Your Cow Herd. Dan Colling, Central Life Science.

Dan will be addressing one of the most common, challenging and expensive summer issues all cow/calf producers face. How to control those pesky flies. Dan has many years of experience and represents a company with multiple fly control products.

## Using "Intake Modification" to Economically and Efficiently Add Weight at Weaning Time. Al Hartman, Purina Animal Nutrition.

Al will be discussing Purina's exclusive "Intake Modifiers" and how cow/calf producers can take advantage of them to add extra weight, economically, and still have a very desirable feeder calf for the feedlot. This is not your ordinary creep program!
