GREETINGS FROM YOUR CEO

Kyle Knutson, CEO

The agriculture industry has once again seen its' fair share of challenges throughout calendar year 2023. Mother Nature kicked it off with a cold, wet spring and followed that with moderate to severe drought in most of our area. Barge traffic on the Mississippi was Impacted by either too high of water in the spring to too low of water in the summer months. As if those challenges weren't enough, add in the smoke from the Canadian wildfires that impacted the amount of sunlight the crops received. Additional challenges throughout the year included high interest rates, high energy costs, the conflict in Eastern Europe, unwarranted low farm milk prices and low grain prices at harvest. The American Farmer is resilient and continues to feed the world through good times and bad. Thank you, Farmer's, for all that you do!

It was another successful year for your Cooperative. While the details of the fiscal year will be delivered at the annual meeting on January 24th 2024, here are a few highlights:

- Sales exceeded \$300 million this year (down from last year's \$315 million).
- Margins dollars were up along with operating expenses.
- Patronage received from Regional Cooperatives combined with our share of income from ESP (Energy Solutions Partners) were up substantially from last year.
- The Board of Directors approved returning \$6.5 million in patronage which will be distributed in March. Patronage will again be distributed 50% in cash and 50% will be in equity. This is in addition to the nearly \$1,000,000 paid out in equity retirements this past year.

As always, your Cooperative continues to look for opportunities to grow the business and to become more efficient. Continued investments throughout all divisions of the Cooperative to maintain our facilities as well as focusing on operational efficiencies include:

- Convenience store improvements. This past year, we invested in a complete remodel of the Almena Convenience Store, which was completed late fall. We also began a remodel project at the Turtle Lake Convenience Store, which will be completed this winter. The newest addition to the Cooperative is the Elk Mound Convenience Store. We are planning to have this new location open before Christmas.
- The Energy Division investment in rolling stock along with the addition of a new 60,000-gallon propane storage tank in Cumberland.
- In the Feed Division, rolling stock continues to be a challenge. Two new feed delivery trucks were ordered some time ago. We were expecting delivery in the spring and still haven't received delivery of them at the time of this writing.
- The Agronomy Division continues to invest in rolling stock, sprayers and spreaders as well as other plant upgrades. A neighboring property in Strum was acquired this summer. This acquisition will give us some much-needed space along with a larger more functional office and a maintenance shop. Improvements to other locations are in the early planning stages as we are looking to the future.
- The Grain Division completed several additional repairs this summer as well as last year. We are looking at other possible improvements that will give us greater flexibility in receiving wet grain and improve our reliability at harvest. The replacement bin in Almena was put on hold due to the soil conditions not meeting the engineering standards for the foundation. We are hopeful to finish that project this summer along with the installation of Natural Gas to fuel the Almena dryer system.
- We also continue to invest in our employees. Our employees truly are our number one asset! Without our employees, we would not be able to serve our member's needs. Thank you to all of our employees for your dedication to the cooperative.

As I mentioned earlier, our Annual Meeting will be held on January 24th 2024 at Turtleback in Rice Lake. Once again, we will be doing mail ballots for the Board of Director elections. The mail ballots have been well received by our members, allowing every member an easy and efficient way to cast their ballot. The annual meeting notice along with the ballots will be mailed out to our eligible producer voters. Ballots can be mailed back to our office or brought with you to the annual meeting.

Thank you to all our customers, you are the reason we continue to invest and focus on growth and efficiencies. Thank you for your business and your support of your cooperative.

Merry Christmas and Happy New Year!

Kyle Knutson

AGRICULTURAL SERVICES

Matt Schofield, COO Agricultural Services

Merry Christmas,

With the anticipation of Christmas being right around the corner, it is a tremendous relief to know that we all have another growing season and harvest behind us. This is hopefully an exciting time of year for everyone to be enjoyed with family and friends in the Christmas spirit. I also believe it's an exciting time to be involved or to be a part of production agriculture and a member of Synergy Cooperative. We all know things move up and down, usually faster down then up in the world of agriculture but I believe the future looks bright and it continues to hold promise and some challenges as we move forward into 2024 and the years to come.

We all know that there are some real challenges facing us in agriculture every day. Whether it be resistant weeds, trying to predict the weather, an untimely breakdown, or unforeseen world events, we have many obstacles in front of us. On the other hand, we have a tremendous amount of opportunity in front of us. The population continues to grow around the world, which means more mouths to feed every day. Research into more biofuels continues and there are more soybean crush plants built as we look to provide more renewable fuels in the near future. Peoples demand for food and fuel is not going away. There are some changing markets no doubt with other sources of energy to contend with, but I believe there will continue to be an exceptional demand for our agricultural products.

And we will need to do this with fewer acres and less people. We currently feed three times as many people with one half the man hours and one third less farmland than we did in 1900. We have accomplished this with better equipment, mechanization, hybrid seed, fertilizer, crop protection and feed products that continue to evolve. We will continue to use more and more technology to develop these products and also the continual use and improvement of technology for Synergy to get to the farm gate to get the work done.

These are a few of the reasons why agriculture has a bright future and why it is a great time to belong to Synergy Cooperative. Synergy Cooperative has been providing services to many of our communities since the 1930's and will continue to do so for years and generations to come. We provide the best service around not only in agronomy but in feed, fuel, propane, repair services and convenience stores to name a few of the things we do for not only our producer's but as well for members of our communities. We provide expertise with our professional sales teams and multiple lines of products to provide you with the opportunity to choose the best product from multiple lineups from multiple companies. Our team at Synergy believes this makes us the best place to do your business and to put your trust in us.

Synergy Cooperative has been and will continue to be an extremely strong part of our agriculture community like no one else can as we return dividends to our patron members and support other activities within our communities and schools. Thank you for your support, Merry Christmas and Happy New Year.

Matt Schofield

GRAIN

Scott Dietsche, Grain Division Manager

Harvest has nearly wrapped up and we are thankful for a safe end to a long season. A season where spring started out wet and ended dry; summer started out extremely dry and ended less dry; November came before October; and now a mostly normal December (albeit dry). With “dry” being the common theme, yet corn yields tended to be average, and some had record yields! Soybeans, however, did not fare as well as the limited rain we did receive favored the corn reproductive cycle, and unfortunately others received some devastating hail.

Undoubtedly, another unique year and now the focus has turned to grain prices and what they might do next. Nationally, corn is likely to come in at an average yield with records acres, and soybeans slightly below average to average, with less than average acres. Demand will rely on exports and South American production and then start to focus on planting predictions for 2024 which peg corn acres to be down and soybeans acres to be up from 2023. Be ready to sell by either calling 715-949-0012 or on the app “Synergy Grain” as prices can move quickly.

The holidays are upon us and I hope a few of you were able to see one of our Synergy Grain Trucks decorated with lights and music in the local parades. Many thanks to the Almena Grain location for their time and energy putting this together!

Thank you, our patrons, for another successful year and I wish you all a Merry Christmas and Happy New Year!

Sincerely,
Scott Dietsche

AGRONOMY

Rich Carr, Northern Region Agronomy Manager

A big thank you goes out once again to all of our patrons for the continued support and partnership of Synergy Coop. It seems that we are getting used to dealing with challenging times of whatever Mother Nature brings our way and yet coming out on top. This success is the commitment and drive we share together to accomplish our goals that allows us to prepare for another year.

Processes that allows us to continue to grow together starts with great communication. Identifying what has worked in the past and what changes we need to make in the future. This year we saw more insect pressure on alfalfa, rootworm pressure on corn and very stressed crops in general from the lack of moisture. With the dry weather, chemicals do not like to work and weeds really like to grow. We have ways to care of this. Having good communication between grower and our Agronomist, we can minimize risk and maximize profit. We have started this process for the 2024 growing season to make sure our growers will be ready for the next challenge. Elite genetics is one key component of seed hybrids Synergy offers. We are seeing stronger yields in really tough environments. Starting from cold and wet springs and going to hot and dry summers we seeing our hybrids powering through. Weed control is also a must. Our Chemical Reps work with our sellers and our growers to get the best performance we can deliver. With solid recommendations, great communication, and early farm planning we will continue to grow together.

Thank you again for your business.

Rich Carr

AGRONOMY

Travis Berg, Southern Region Agronomy Manager

I'd like to say Thank You again for your business in the past along with your business going forward! We really appreciate it and we will do everything we can to help you run a profitable business.

The fertilizer markets continue to be firm after we saw a bit of a summer reset. With the dry fall season, we saw a high amount of fertilizer applied throughout the nation. Good yields meant that high Potassium and Phosphorus amounts were pulled from the soils and growers were not shy in replacing this product. Fall anhydrous was also applied at record amounts to the south. Due to this good fall application season, our favorable stockpiles of Potash have been diminished more than expected. Dry Phosphates started the fall season with a supply concern which has only caused supply to be tighter. The nitrogen markets are much less volatile than they have been in the past few years, but I expect relative stability going forward.

Continue to work with your Synergy Agronomist on planning your spring planting season. If you had good yields, remember that P and K levels can easily be pulled down over time causing yield losses. At these prices, it is likely a good time to build those soil levels up or at least keep maintaining them. Our main source of dry Phosphorus is S10. It has an analysis of 12-40-0-10S and is based from MAP. One big advantage of using this product is from its sulfur sources. S10 has half of its sulfur in the sulfate form, making it highly soluble for plant uptake. The other half is in an elemental form which will stick around longer for later uptake. This product should be a great fit on your farm maintain good soil phosphorus levels for the future.

Thank You!

Travis Berg

FEED

Bob Hinrichs, Feed Division & Operations Manager

MERRY CHRISTMAS AND A HAPPY NEW YEAR FROM THE SYNERGY FEED DIVISION!

Warm weather and no snow on December 8th, 2023. Part of me wants to be thankful for the nice weather and of course, the more pessimistic side wants to find challenges with it all. Oh, I worry about a dry winter leading to another dry summer and a warm winter of course means that Synergy is not moving a lot of heating gas. It can all change but one thing is for sure the nicer weather has shortened up the winter. With winter festivities in full swing, the last thing you want from me is a long rambling article so I will do my best to make this quick. What I want to share are all the exciting changes in your feed division.

Let's start up North. In Ashland, your Cooperative is building a retail addition. Currently, we have a small store that you either have to walk through the manufacturing/warehouse area to get to or go up some stairs on the north side of the building. If you are familiar with the Ashland location then you realize that the north side of the mill where the stairs are located faces the lake and the wind that can come from the North is well let's say it is lifechanging. The new store will be on the south side with doors facing south and it will all be at the ground level. Folks will no longer have to go through the mill to order their feed. John Thomas our location manager has had and grown a thriving retail business. His focus on that business and ability to hire great people to serve the customers made it an easy decision to build an enhanced retail area. With over 80 customer walk-ins per day, we wanted to make it as safe and inviting as we could for those customers.

Moving to our Rice Lake location we added some much-needed cement where our trucks load and semis unload. It is the first part of a two-step project. The second step will be to pour cement around the front of the mill allowing the area where we dump grain and the higher traffic area to be easier on all vehicles. When the project is completed, it will allow areas around the mill to be kept clean and free of snow.

Moving further south to our Elk Mound location we have also made some improvements. We have built a feed office out in the mill proper. With increased business out of our Elk Mound location, we need a place where we can serve those customers better. Britt Meyers will be at the counter most of the time and she does have nutritional experience so she is a wonderful resource if you have questions. We are cross-training both counter and mill manufacturing so you will see others at the counter sometimes as well. The office is located on the south side of the mill and we have poured new cement in front of that office as well for parking.

Now I do not have enough room to tell you about all the great things going on throughout your feed division. I only hit on the very big items. Two more points to make is that business has been growing although last year we did see tonnage decline. With the increased demand we have hired two more nutritionists. Jeremy Symitczek has joined our team and lives on a farm in the Waumandee area. he specializes in plastics and inoculants but is a great overall nutritionist. Jeremy is extremely ethical and strives to take care of the producers. He has been in the Cooperative system for over 20 years. Ben Donnay has also joined the Synergy staff and has a small farm by Baldwin. I was going to call it a hobby farm but growing up on his home farm they did a lot with genetics and he has carried that through as he has had animals that he has taken to dairy expo. If you get a chance, please greet both of these great additions to your Cooperative.

Well, so much for keeping it short. As always keep first things first (Faith, Family and Farming). Blessings on the time you share with loved ones during this special time of the year. Thank you for all your support! Keep an eye out for all these great changes and more.

Bob Hinrichs

SAFETY

Mathew Heath, Safety & Compliance Manager

Another bountiful year is coming to a close for us here at Synergy and for many of you. As we celebrate the coming of the New Year, we find ourselves looking back on the year prior. For many of us, we look back at the decisions we made that possibly led to affluent outcomes, or maybe it was a poor decision we dwell on. No matter who you are, we all have decisions or situations that we look back on and wish we would have handled them differently and picture what the outcomes could have been. Maybe it was contracting propane at the wrong time or selling grain or livestock and being on the wrong side of the deal. All of us struggle with the “could have beens”, and “what ifs”.

Unfortunately, when it comes to safety, we generally don’t get a chance to look back on the poor decisions we made. One wrong decision can easily lead to a lifelong struggle or the loss of life entirely. For many of us dwelling on the past is a way to correct our future, when it comes to our safety and the safety of our loved ones, we might not get the chance to dwell on the decision. So how do we know if we are making the right decision or completing the job in the safest way possible? That’s a difficult question, but it’s one that can be answered with a simple adage, worry about what we can control. As some say, “watch your own bobber” or “keep your eyes on your own rows”. Understanding and focusing on our circumstances and doing what’s best for yourself in the moment is the easiest and best way to make sure you make it through the job safely. AS we get ready to take off with another new year, approach the job with the mindset of focusing on what you can control, and your safety will become top priority.

Mathew Heath

SERVICE STATIONS & HARDWARE

Mark Kucko, Service Stations & Hardware Stores

Service Stations

It's time to get your vehicle ready for the winter months ahead. We would like help you with all your needs at one of our five conveniently located Service Stations. We offer services such as oil changes, brakes, tune ups, batteries, starters, alternators, transmission work, coolant, struts, shocks or anything else you need done so you are ready for winter weather. We have a great selection of tires for your car, truck, trailer, ATV, or UTV available for to keep you and your family safe on the winter roads.

We also have on the Farm Tire Service along with a selection of tractor, wagon and any implement tires for your needs. Give any of our Service Station locations a call for quality service.

Thank You For Your Business and Have A Great Holiday Season With Your Family and Friends.

ENERGY - PROPANE & FUEL

Brady Arntson, Propane Division Manager

Hello from the Propane Division,

The temperatures to start out the heating season has been favorable – favorable for being outside and enjoying warm temperatures as well as favorable for not using as much propane. There have been about 6.5% less heating degree days than last year up to this point which could equate to about 6.5% less gas usage. That said, it is a good habit to check your tank weekly to know your tank level. This is the time of the year when we have the most “will call” customers run out of propane when they don’t watch their tank percentages and call in timely, which can lead to propane outages and potential unwanted charges.

Current U.S. propane inventories are above last year and toward the upper end of the 5-year average. With the majority of the corn harvest complete, the propane export market and the severity of the winter weather will drive the market through the rest of the winter. U.S. propane exports reached a record 1.7 million barrels per day earlier this year, the highest level since collecting this data in 1973. Propane is consumed globally for heating and is used as a petrochemical feedstock. U.S. domestic propane production is keeping pace with the increased export demand which is helping to maintain inventory levels.

As a reminder, please keep your driveways plowed as well as a path cleared to your tank to allow your delivery driver to access your tank safely. It is also recommended that you keep your propane tanks clear of snow to allow daylight/sunlight to warm the tank which will help the propane boil in the tank to produce higher vapor pressure. As the temperature of the propane gets colder it drastically reduces its ability to boil and create vapor. The liquid propane needs to boil in the tank to create vapor to supply your propane system.

When clearing your tanks of snow, please use a broom to avoid damaging the finish coatings of the tank. Please take time to periodically look at the regulators that are mounted to the outside of your buildings and make sure they remain clear of snow.

Gauge at 30%

Please call to order a delivery when your tank gauge reads 30% to allow ample time for your cooperative to efficiently schedule your delivery. The more orders that we can “pool” for delivery in your area, the less miles we have to drive to deliver gas. This allows us to be more efficient and reduce delivery costs, which in turn, enables your co-op to be more profitable and return a higher dividend to you, our member owners.

Steps to take if you smell gas or suspect a leak:

- Extinguish all smoking materials and any other open flames or sources of ignition.
- Get everyone outside and away from the home or building.
- Do not use a land line phone or operate any light switches.
- Call your propane supplier or call 911 (use a cell phone outside or a neighbor's phone if the propane smell is coming from inside the house).
- Stay outside and leave the gas off until assistance arrives.
- Do not re-enter the building until it has been deemed safe.

Please follow these guidelines for the safety of you and your family.

Thank you for your patronage and I hope you have a safe and enjoyable holiday season!

With the area that we live in being very rural, trees and bushes are part of our lives, homes, and scenery. That said, sometimes these limbs and shrubbery can make it difficult for the drivers to reach the places they need to. Hanging tree limbs can block our trucks from safely entering your driveway or over to your tank, even going so far as to snap off and fall down. Please keep in mind that trees with snow on them do sag (especially pines), so they may need extra clearance. If trees contact our truck we may not enter your yard and be able to make your delivery until the trees are trimmed, so we ask that you help our drivers out by keeping them neat and trimmed. Also if you have a shared private road those also need to be maintained, if we can't get down your road we can't get to your driveway.

Hello from the Fuel Division,

In 2023, volatility in the energy sector has continued. Crude oil has traded between \$66/barrel to \$93/barrel as shown in the graph below. In addition, gasoline has changed about 70 cents/gallon from the yearly high/low and diesel has varied \$1.08/gallon. With all the ups and downs in the market, knowing when to buy can be a challenge.

One of the most common questions we hear this time of year is if it's a good time to contract fuel for next year – like many questions, that can be a hard question to give an easy answer to. To keep it simple, I like to ask, "what price would you like to pay?" Some will say, "I want the cheapest price", but a person would only know that in hindsight after the whole year is complete. What I look at is: past performance, recent trends and having a strategy of buying dips in the market. When it comes to locking in diesel gallons if you stay patient and leverage Synergy's Energy support team throughout the year with questions and market updates, our patrons can best plan their fuel expenses.

Crude inventory levels are below the 5 year average but have seen recent builds, Diesel (Distillate) inventory is well below the 5 year average and have seen recent draws, and gasoline inventory is above the 5 year average.

With the volatility in the fuel market, we have a knowledgeable support staff to customize a plan for you. If you are interested in contracting fuel or would like to receive more information about fuel, please call one of our Energy Specialists for more information or a daily quote.

Bulk Diesel Exhaust Fluid is Here!

Synergy Cooperative has bulk DEF, DEF Totes, and DEF Drums in stock. We also have DEF equipment as well to meet your needs. If you are interested in learning more about DEF for your operation, please contact Ryan Burns in Almena, Todd Mandel in Rice Lake, or Josh Sykora in Elk Mound.

Cenex Premium Oils

No matter if you're running a farm, fleet, or construction operation, Cenex® lubricants are blended and manufactured with the premium quality you need to keep your equipment running.

Synergy Cooperative provides quality Cenex products that meet or exceed OEM specs, this is key to your equipment running and avoiding costly downtime. Equipment lookup is a great way to check which Cenex oil meets your specific equipment needs, go to <https://chs-cenex.ewp.earlweb.net/> and enter your equipment information.

In addition to our full lineup of packaged oil products, Synergy offers upright round 65- and 100-gallon bulk oil tanks, stands, and a drip pan to our bulk oil customers. This is meant to work with your operation to offer the convenience of having premium products on hand when you need them. This is the easiest and most cost-effective way to buy your oil - just order through your energy sales representative and your premium Cenex oil will be delivered within the next five business days (or possibly sooner).

We encourage you to reach out to our Energy Team of Ryan, Todd, and Josh to talk more about how Cenex Premium Oils can help you and your operation.

MACHINERY

Jesse – Missy – Duane – Jeff – Bruce – Josh – Bob - Albert – Jeremy – Al – Brian – Gene - Brady

We've had another successful year at the Machinery Dealership thanks to our valued customers!

This year we've grown our whole goods inventory and parts departments to better serve you. If you've been in the Dealership recently you noticed a couple new faces. In May we added Josh Schmidt to our sales team. Please feel free to stop in or call Josh or Bruce for any sales needs. In September we added Robert Egge to our parts department. Robert is a great addition as he brings a lot of experience to the position. Any one of the parts guys - Duane, Jeff or Bob - will be happy to help get you the parts and supplies needed to keep your equipment up and running.

The front entrance also got a face lift this year. We had Wirth Excavating removed some trees out front and put in new gravel for inventory parking. This was much needed as we were running out of room to display equipment. Monarch put new pavement down for customer and employee parking around the facility.

The work load in the shop hasn't slowed up much heading into the Holidays. If you have repairs that need to be done before spring, don't wait too long. Call Jesse now and we can schedule your repairs this winter. Albert, Gene, Al, Brian, Jeremy and Brady are happy to help get your equipment field ready!

Stop in and check out the new Husqvarna line of saws, trimmers and more! We still have some Echo inventory that is being blown out at cost. Come get a new Echo before they're gone!
Thanks again to our valued customers for another great year!

Thanks,
Jesse Davis, Machinery Manager

(715) 949-1795

CONVENIENCE STORES

Troy Strand, Convenience Store Operations Manager

Rewards Program Loyalty Application

- Manage your account by updating your profile
- Receive important notifications from us on a real-time basis
- Use your mobile device as your rewards card to earn and redeem points
- View your transaction history in real-time
- View your points earned and used along with your current balance
- View and take advantage of any promotions we have
- Locate any one of our retail locations through location services
- View and apply for any career opportunities within all divisions
- Leave us important feedback to help us serve you better

The Synergy Rewards App is available in the apple store and google play or scan the QR code above. Due to some technical barriers, we are not able to track patronage on the new App. This will be for “**Rewards Only**”. We are hoping with future technology advancements within our structure that this is only temporary. We will continue to work to advance this program to make it easier and more user-friendly.

Almena

The Almena remodel is finally complete! From asphalt to the inside, there is not one square inch that wasn't touched. Come on in and check out all the new offerings and product expansions. From hunting and fishing to Pitt Stop BBQ, we pretty much carry it all now. No time to wait in line? We also added one of the most advanced self-checkouts around. Please stop in and see Gari and from all of us here at synergy, we hope you enjoy your new store!

Turtle Lake

If you haven't driven through Turtle Lake yet, you probably should. The Turtle Lake CENEX is undergoing a major transformation. We have added over 350 sqft to the original footprint. This will allow us to drastically expand our offerings. The store remodel will include; new doorless restrooms, new advanced kitchen, new service counter, new walk-in cooler and freezer, all new flooring and an unrecognizable exterior facelift. New asphalt will happen in the spring of 2024. We are excited to improve our presence in the Turtle Lake community and hope it meets everyone's expectations.

Elk Mound

An agreement has finally been reached on the old Shell site in Elk Mound. We plan to open in late December. We are adding a walk-in beer cave, Hot Stuff Kitchens and a new improved diesel fueling station. We look forward to serving our friends in the Elk Mound community.

*Smoked
3 Meat
Combo*
