

Good morning,

Weaker again this morning corn down 2, beans down 8 at the morning break. No fresh news to give this market a boost. Export Sales for last week 19.7 million for corn 17.8 million beans right in the middle of expectations. Planting progress rolling right along locally. Rain showers expected this afternoon. After today looks like a 5 day dry window, with some cooler temps. Post-open weaker here this morning as we trade @11.
