

Make it easy to access AgVisionAnytime.com from a mobile device.

You now can download an icon to your mobile devices to access your Anytime account. When you first login to your account from that icon, you will be prompted whether you want to save your username and password.

Below are step by step instructions for downloading the app for both Android phones (typically using Google Chrome browser) and iPhones (typically using Safari browser).

For to Androids Devices:

1. Log in to your Anytime account (conditionally selecting keep me logged in)
2. Once on your dashboard, you will see a banner at the bottom stating [Add AgVision to Home screen]
3. Touch the banner, and you will see a popup with the name of the app with an Add and Cancel button.
4. Press Add. It may take a few seconds to show up in your apps page, and you might have to drag it to the correct spot.

For Apple Devices:

1. Log in to your Anytime account (conditionally selecting keep me logged in)
2. On the dashboard, you will see instructions explaining the next steps, as well.
3. Press the share icon : 
4. Scroll until you see the "Add to Home screen" button. Press that button
5. Follow Safari's instructions for adding it.
6. **Occasionally, Safari fails to create the proper shortcut. If this happens, you'll see only the logout screen when you try to use it from your desktop.

Solution:

- a. Delete the icon from your Home screen.
- b. Close all open safari pages, and restart safari completely
- c. Follow the "Add to Home screen instructions for **Safari:**" again.
