

Average Pricing Program

Let us know how many bushels you would like to enroll by the end of the day on November 12th, 2018. This tool can be used to price fall 18 corn as a DP alternative

An equal percentage of bushels will be priced every trade day, from November 12th, 2018 to December 31st, 2018 creating an "Average Price" during the Winter.

There will be no service fee charged for this contract.

You must set the basis on your grain the day that you sign up for this program.

- This seasonal pricing program simply aims to achieve an average price over an 7 week period of time which historically yields the second highest seasonal prices.
- In a diversified marketing approach having a small percentage of production priced in this emotionally-charged period of time makes sense.
- Historical price patterns are not a guarantee of future price movements
- We will be offering this program for both Corn and Soybeans.

Marketing your crop during the uncertain growing season can be difficult, but it often yields the best returns historically. This program helps put the odds in your favor!
