## HAVE QUESTIONS? WE HAVE ANSWERS.

ECG has been helping physician groups and ambulatory care networks across the country improve outcomes for more than 40 years. Physician practice management and operations, technology, and finance are what we know best. We're dedicated to helping organizations identify and address immediate fixes, while also working closely with clients to design long-term strategies that can transform their performance and help them better meet the needs of the communities they serve.

Our consultants are available to share their knowledge and provide expert commentary for both industry and general public audiences.

### ECG's Areas of Expertise

- ACO and clinical integration initiatives
- Physician network/practice technology solutions
- Efficient cost structures
- Revenue cycle changes and risks
- Physician deployment, productivity, and compensation
- Payor contracting
- Leveraging data for performance improvement
- Physician enterprise organizational structures
