

PAST PARTNERS

[Africare](#)'s mission is to improve the quality of life of people in Africa. Africare centers its development approach on active community participation and partners with local organizations to ensure institutional strengthening and capacity-building.

[The Association of Women's Health, Obstetric and Neonatal Nurses](#) (AWHONN) is a nonprofit

membership organization that promotes the health of women and newborns. Its mission is to improve and promote the health of women and newborns and to strengthen the nursing profession through the delivery of superior advocacy, research, education and other professional and clinical resources to nurses and other health care professionals.

[BVGH](#) is a results-oriented nonprofit organization dedicated to solving global health issues by forming connections between people, resources and ideas. BVGH was established to engage biotechnology, pharmaceutical and diagnostic companies in meaningful initiatives to impact and improve the lives of individuals living in low- and middle-income countries (LMICs).

[Catholic Medical Mission Board](#) (CMMB) is an international NGO providing long-term, co-operative medical and development aid to communities affected by poverty and unequal access to healthcare. CMMB's global movement focuses on developing access to needs-based healthcare in partnership with communities, government and international agencies, private and corporate donors, medical and pharmaceutical manufacturers, and local organizations.

[The Centre for Catalyzing Change](#) (formerly the Centre for Development and Population Activities [CEDPA] India) is a non-governmental organization with the mission to empower women in

all sectors of development and to that end it works with young people, including in and out of school adolescent boys and girls in rural and urban India. Its technical expertise extends to incubating, implementing and scaling up programs focused on its thematic areas of youth education, gender and maternal health/reproductive rights, specializing in at- scale program implementation, monitoring and evaluation.

Center for Global Health & Development

[The Center for Global Health & Development \(CGHD\) at Boston University](#) is a multidisciplinary research center that engages faculty from across the university to help solve the critical global health and social development challenges of our time. The mission of the center is not only to conduct high-quality applied research, but also to advocate for the use of this research to improve the health of underserved populations around the world. Through collaborative work with scientists worldwide, it also seeks to strengthen individual and institutional capacity to conduct and utilize research. Over 90 employees and field staff are engaged in center-based research activities in more than 20 countries.

Peruvian women have one of the highest rates of cervical cancer in the world. This is disproportionately true for impoverished, indigenous women who live in the isolated mountainous regions of the country. [CerviCusco's](#) mission is to reduce morbidity and mortality of all women in the region of Cusco through medical treatment and outreach with a culturally sensitive high quality of care.

[Drugs for Neglected Diseases initiative \(DNDi\)](#) is a collaborative, patients' needs-driven, non-profit drug research and development (R&D) organization that is developing new treatments for patients suffering from the most neglected communicable diseases. Acting in the public interest, DNDi bridges existing R&D gaps in essential drugs for these diseases by initiating and coordinating drug R&D projects in collaboration with the international research community, the public sector, the pharmaceutical industry, and other relevant partners.

[Hindustan Latex Family Planning Promotion Trust \(HLFPPT\)](#) is a not-for-profit organization, founded to design and implement social interventions in the areas of reproductive health, encompassing maternal health, family planning, child health, HIV/AIDS and adolescent

sexual health. HLPPT works with a vision of increasing access to quality healthcare products and services. Over the last two decades, HLPPT has reached out to more than 420 million people across rural and urban India to provide quality healthcare services at their doorsteps.

[The International AIDS Vaccine Initiative \(IAVI\)](#) is a global not-for-profit organization whose mission is to ensure the development of safe, effective, accessible, preventive HIV vaccines for use throughout the world.

[The International Centre for Diarrhoeal Disease Research, Bangladesh \(icddr,b\)](#) is committed to solving public health problems facing low- and middle-income countries through innovative scientific research – including laboratory-based, clinical, epidemiological and health systems research. By developing, testing and assessing the implementation of interventions specifically designed for resource-poor settings, it aims to improve the health and wellbeing of people living in the world's poorest nations.

[IDRI](#) (Infectious Disease Research Institute) takes a comprehensive approach to combatting infectious diseases, combining the high-quality science of a research organization with the product development capabilities of a biotech company to create new diagnostics, drugs and vaccines to eliminate infectious diseases of global health importance.

[Jacaranda Health](#) aims to make pregnancy and childbirth safer for women and newborns by transforming maternity care in East Africa. It builds private maternity clinics in peri-urban areas and is innovating to provide patient-centered care that combines quality and affordability.

[Jhpiego](#) is an international, nonprofit health organization affiliated with the Johns Hopkins University. Jhpiego empowers frontline health workers by designing and implementing effective, low-cost, hands-on solutions to strengthen the delivery of health care services for women and their families.

[Marie Stopes International \(MSI\)](#) provides women around the world with a full range of quality sexual and reproductive health services. It offers services to the most under-served communities through over 600 centers, the thousands of private providers who belong to its franchise networks, and its outreach teams – doctors, nurses and drivers - who travel out to hard-to-reach areas in more than 30,000 locations.

[Medicines for Malaria Ventures \(MMV\)](#) is a not-for-profit public-private partnership, established as a foundation in Switzerland in 1999. Their mission is to reduce the burden of malaria in disease-endemic countries by discovering, developing and delivering new, effective and affordable antimalarial drugs.

[MSD Wellcome Trust Hilleman Laboratories](#) is a unique joint venture between the Wellcome Trust and Merck & Co. Inc., Kenilworth, NJ, USA. A global vaccine research and development organization, Hilleman Laboratories is focused on making affordable vaccines using innovation to address gaps that exist in low resource settings. It acts as a catalyst in bridging the gap between academic research and product development by targeting novel vaccines and increasing the efficiency of existing vaccines.

[Operation ASHA](#) is dedicated to bringing tuberculosis treatment and health services to the poorest of poor in India's urban slums and rural villages. It is among the world's largest NGOs in tuberculosis treatment and prevention, making these services available to millions of people who have little access to basic healthcare.

[Pathfinder International](#) is driven by the conviction that all people, regardless of where they live, have the right to decide whether and when to have children, to exist free from fear and stigma, and to lead the lives they choose. Since 1957, it has partnered with local governments, communities, and health systems in developing countries to remove barriers to critical sexual and reproductive health services. Pathfinder works to expand access to contraception, promote healthy pregnancies, save women's lives, and stop the spread of new HIV infections, wherever the need is most urgent.

[Physicians for Peace \(PFP\)](#) engages compassionate world citizens to deliver training and support to healthcare teams in underserved regions. The organization works with local health professionals to introduce skills and fill specific training gaps, while mobilizing targeted equipment and supplies that are scarce in the developing world. Regardless of the country or region, its goals are the same: self-sufficiency and better health.

[PSI](#) (Population Services International) makes it easier for people in the developing world to live healthier lives and plan the families they desire by marketing affordable products and services. PSI focuses mainly on family planning, oral rehydration therapy and safe water, as well as HIV, malaria and tuberculosis prevention.

[Possible](#) (formerly Nyaya Health) is a nonprofit healthcare company that delivers high-quality, low-cost healthcare to Nepal's rural poor by delivering transparent, data-driven health care. In addition to providing day-to-day care, Possible partners with government agencies to promote the creation of just systems and "infrastructure for equity," which creates the possibility for the right to health and sustainable change.

[Project HOPE](#) delivers essential medicines and supplies, health expertise, and medical training to respond to disaster, prevent disease, promote wellness and save lives around the globe.

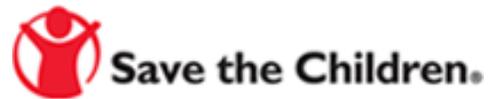

[Kilimanjaro School of Pharmacy \(KSP\)](#) is a part of the Good Samaritan Foundation in Northern Tanzania and partners with Purdue University in the U.S. The vision of KSP is to achieve self-production, ownership, responsibility and identity leading to quality health care for all in Africa.

[The Safe Water Network](#) envisions a world with healthy, thriving communities, each managing its own sustainable supply of safe water. Its mission is to develop and demonstrate affordable, economically viable solutions, to share sector knowledge, and to build partnerships that reach millions in need.

[Save the Children](#) invests in childhood – every day, in times of crisis and for the future. In the United States and around the world, it gives children a healthy start, the opportunity to learn and protection from harm.

[Sightsavers](#) is an international organization working with partners in developing countries to eliminate avoidable blindness and promote equality of opportunity for people with disabilities.

The [White Ribbon Alliance](#) is a global network of maternal health advocates campaigning for more resources and the right policies to prevent the needless deaths of women, while holding governments and politicians accountable for their promises of action.

[World Health Partners \(WHP\)](#) is an international, not-for-profit organization that delivers healthcare within a walkable distance in underserved communities. WHP identifies and harnesses existing resources to construct a service delivery channel and uses widely available technologies, such as mobile phones, to aid in service delivery and communications and referrals. While most of its work has been through women entrepreneurs facilitating medical consultations with remote doctors, WHP is increasingly forging relationships with governments to combine the people skills of the private sector with the medical skills of the public sector.
