Africa

Dr. Tendai Manyeza

"I first became aware of God's presence in my life during one of the many revivals I used to attend at my rural home."

Tendai Manyeza grew up in a Christian family in Zimbabwe. Serving Jesus Christ was woven into the fabric of his being. He is a harvest of seed planted by committed missionaries a generation earlier.

God opened doors for Tendai to study and follow a call to become a doctor. He attended the University of Zimbabwe in Harare where he earned his medical degree. He worked in Harare and Parirenyatwa Central hospitals before accepting his current position in 1995. Today Dr. Tendai Manyeza is a missionary serving through the United Methodist Church. He is administrator and Chief Medical Officer for Old Mutare Mission Hospital of the United Methodist Church in Mutare, Zimbabwe.

Dr. Manyeza has served the United Methodist Church as a district finance person and conference medical secretary. He is also a part-time lecturer in the health sciences department at Africa University. Tendai is married and his wife is completing her theological training at Africa University responding to God's call to a life of service in His name. They are the parents of four children.

PUMC is excited to be a partner with Dr. Manyeza and his service to his people in Jesus' name. We provide financial and prayer support for his work in Africa. United Methodists through the Board of Global Ministries touch lives around the globe in strategic places as, together, we witness to the power and love of God through Jesus Christ. You can contact Dr. Manyeza directly at tmanyeza@yahoo.com

"I am in the healing ministry because God has a purpose for me in that ministry. I believe I am still operating in God's plan by responding to this call to mission. I shall do my best to serve my God and all people he assigns me to serve."

- Tendai Manyeza
