Re: Alternate Foundation Systems

Dear Mr. Colley,

Our installation manual describes, in detail, one method for the anchor and pier installation of our homes. Although the manual only describes one type of foundation, it is recognized by Cavalier Homes, Inc. that there are other types of foundations in the market place today. It is Cavalier's position that the following foundation systems are approved, as an alternative tiedown system, for the installation our manufactured homes:

- All Steel Foundation System by Oliver Technologies
- Vector Dynamics Lateral Foundation System by Tie Down Engineering
- Xi Lateral Stabilization System by Tie Down Engineering
- Minute Man Anchors Longitudinal and Lateral Brace System (MMA LLBS)

Provided the following provisions are met:

1. The authority having jurisdiction has also approved the system
2. The foundation system is installed specifically per the manufacturer's instructions
3. A registered engineer or architect must approve the manufacturer's instructions.

This letter includes the following divisions:

- Astro Homes
- Bellecrest Homes
- Belmont Homes
- Brigadier Homes of North Carolina
- Buccaneer Homes
- Cavalier Homes of Alabama
- Homestead Homes
- Mansion Homes
- Riverchase Homes
- Spirit Homes
- Town & Country Homes

If you have any other do not hesitate to call.

Sincerely,

Chris D. Waldrep, P.E.

Re: Perimeter Blocking

Homes produced by Cavalier Homes, Inc. to meet the requirements of the 30 psf roof live load, but installed in a 20 psf roof live load area, do not require blocking around the perimeter of the home.

If you have any questions, please feel free to contact me.

Thanks,

A handwritten signature in black ink, reading "Chris D. Waldrep". The signature is fluid and cursive, with a long horizontal stroke at the end.
