Re: Alternative Bracing/Foundation System

To Whom It May Concern:

Manufacturer requires providing at least one method of installation –Federal Standards 3280.306(b), but alternate methods of foundation installation can be used if designed and approved by professional engineer or architect under Federal Standards.

All Steel Foundation Brace System by Oliver Technologies is *acceptable* anchoring system as an alternate foundation system in set up of Karsten manufactured homes and may be subject to review, approve or disapprove by local building officials.

For proper capacity of piers, footing sizes, mating line supports, etc. refer to Installation Manual of Kasten Company.

Use of this system and any adverted reaction than could arise from it are responsibility of Oliver Technologies and/or the Homeowner.

If you have any questions feel free to contact our office.

Sincerely,
