Re: Alternate Foundation System

To Whom It May Concern:

The 1100V Series by Oliver Technologies is an approved alternate foundation system for both new and used homes produced by New River Homes, LLC, provided the following provisions are met:

- 1) The manufacturer's instructions are approved by a registered professional engineer.
- 2) The foundation system is installed per the manufacturer's installation instructions.
- 3) Approval from the appropriate State has been granted.
- 4) The authority having jurisdiction at the local level has also approved the system.

The use of this system and any adverse reactions that may arise are the responsibility of Oliver Technologies, the installer and/or the homeowner.

Sincerely
