RE: Idaho Approval of Prefabricated Manufactured Housing
Installation Components

Dear Mr. Oliver:

The following products have been approved for use in Idaho in accordance with their listings:

1. Model 1100 1 "V" All Steel Foundation System for Wind Bracing in Wind Zone 1 and Seismic (Transverse and Longitudinal Systems) RADCO Test Report RAD-3233
2. Model 1100 IC "V" All Steel Foundation System, Concrete Foundation System for Wind Bracing in Wind Zone 1 (Transverse and Longitudinal Systems)
3. Model 1100 "V" Longitudinal All Steel Foundation System acting as a support pier. RADCO Test Report RAD-3396 (4000 lb. capacity)
4. OTI Steel Pier Support Pan (OTI Part No. 1100-1A-G) for use as a Pier Support Footing. RADCO Test Report RAD-3396 (4000 lb. capacity)
5. OTI, CBI & CB2 ABS Cap Boards for use as Pier Capping. RADCO Test Report 3388 & 3397 (4000 lb. capacity)

All products identified above shall be appropriately labeled in accordance with their listings and your company's submitted label proposal.

You should be prepared to make available copies of your test reports and this Idaho approval letter upon request.

Sincerely,

A handwritten signature in black ink, appearing to read "Jack Rayne", with a long horizontal flourish extending to the right.

JACK RAYNE
Building Bureau Chief
