Mr. Lon Larson
Oliver Technologies, Inc.
562 Glen Heather Rd.
San Marcos, California 92069

Dear Mr. Larson:

Please be advised that the State of New Mexico Manufactured Housing Division has received and reviewed your request to approve "Anchors of all Model #'s submitted as listed in your requested letter" for Manufactured Homes.

Based upon our review, we hereby approve "Anchors Foundation Products" to be used as traditional manufactured home foundation products of manufactured homes. "Anchors Foundation Products" must be installed as per Manufacturers Installation Manuals.

This approval is based upon the engineering analysis performed on this product, and must be installed in accordance with "Manufactured Home Foundation Products" installation instructions, as on file with the Division. Furthermore, if the State requires the licensed installer to perfect a section of the State regulations, the State regulation will apply, not your company's installation instructions.

This approval is hereby granted until *January 5, 2005*, or until the Division deems it necessary to withdraw approval. A State permit must be issued upon the approved material being installed.

If you have any questions regarding this approval or the permit process, please do not hesitate to contact me at (505) 827-7070.

Sincerely,

Pasqual Armijo III
Bureau Chief

Re: Model OTLT Longitudinal Beam Clamp

Dear Mr. Oliver:

I have reviewed the enclosed Tri-State Testing Services, Inc. Test Report No. LO-28487 for the subject clamp, including the test procedure and test results. I fully concur with the test procedure and results, and further concur that the device will meet the load requirements when installed, in accordance with the included installation instructions, on a manufactured home complying with the Federal Manufactured Home Construction and Safety Standards.

Sincerely,

Ray Tucker, P.E.
Consultant
