Re: Oliver Technologies, Inc. All Steel Foundation System, Model 1100 "V" Series

Dear Mr. Lower:

We have reviewed the Model 1100 "V" steel bracing system that is designed to be installed with, and to augment a conventional pad and pier or poured concrete manufactured dwelling set-up. We concur with your engineering and testing that your Model 1100 "V", when installed according to your installation instructions will satisfy our requirements for resisting wind forces in HUD Wind Zone I. All other requirements of the set-up stated in Oregon's Manufactured Dwelling and Park Specialty Code - 2002 Edition must be met.

We thank you for the opportunity to observe your product and for all the information you provided us. If you have any comments, questions or concerns please feel free to contact me at (503) 378-2306.

Sincerely,

Larry Iverson
Chief of Manufactured Structures & Parks
