

NOAA FISHERIES

Monitoring Service Provider Vendor Show

The Industry-Funded Monitoring (IFM) Omnibus Amendment is considering Electronic Monitoring (EM) and Portside Sampling (PS) as a monitoring option for the Atlantic herring midwater trawl fishery.

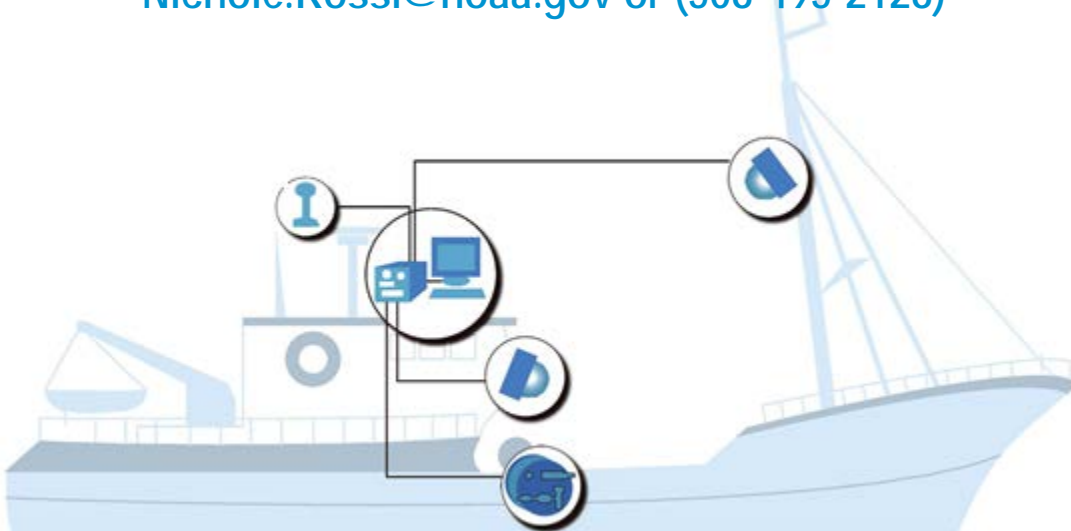

This vendor show will introduce Monitoring Service Providers (Observer, At-Sea Monitor, EM, and PS Monitor) to fishing industry participants, interested stakeholders, and the Council. The show will help familiarize the industry with monitoring options available and provide a networking opportunity.

Sheraton Harborside, Harbor's Edge Room
250 Market Street
Portsmouth, NH 03801

Tuesday, January 30, 2018 from 9AM – 4PM
