1. A vendor clocked thirty road miles based off the highlighted sections. Could you elaborate on the 30 miles stated in the RFP?

2. There are numerous downed trees, logs, branches along the edges of fire blocks and lanes. Will removal be required along the edges?

The 30 miles are based on an estimate from the mapped out highlighted areas (both the orange and yellow highlighted areas) in the appendix. As long as they are over the edge into the pathway of the lanes, the City would want them removed.
