

April 23, 2018

Dear Neighbor:

SoCalGas continues to work on its pipeline located adjacent to the intersection of Hannum Avenue and Playa Street. The project consists of inspection of a natural gas transmission pipeline that will include safe release of natural gas into the atmosphere. This maintenance work is mandated by the California Public Utilities Commission (CPUC).

On Wednesday, April 25, our work will commence at 3:00am to safely release natural gas into the atmosphere and should conclude by 7:00am. We may work extended hours if necessary due to unforeseen circumstances.

Inclement weather or other unknown events may extend the completion date. This project will **NOT** interrupt gas service to our customers in the area.

Our highest priorities are to work safely and to provide you safe and reliable natural gas service.

If you have any questions, please contact me at [ASolomon@semprautilities.com](mailto:ASolomon@semprautilities.com) or 213-332-4662 or Mr. Mike Harriel at [MHarriel@semprautilities.com](mailto:MHarriel@semprautilities.com) or 213-244-4633.

Thank you in advance for your cooperation.

Sincerely,
