

## MESSAGE FROM OUR CHIEF

It is hard to believe that it is November. Although the holidays bring joy for many people, there are some people that it affects adversely. This time of year brings a rise in depression related incidents and suicides, as well as, incidents related to the excessive alcohol consumption or drug abuse. I am no psychologist but whether it be stresses of family life, work, or finances, the rise in violence seems to go right along with it. When it comes to alcohol or drug abuse at this time of year, please remember that there is no answer at the bottom of that bottle. The only thing at the end of that "ride" is more pain.

Violence is also never the answer and remember that children exposed to these events, especially at the holidays, relive these experiences throughout their lives. The young and abused become future abusers. The cycle of abuse, whether verbal or physical, has to stop being shared with our future generations.

For family, friends, or neighbors that are struggling at this time of year, you should extend a hand to help, offer comfort, or just lend them some of your time to visit. In addition, there are many social service organizations and networks that could be recommended in person or anonymously. Often times, helping others during stressful times can act as its own self-help to let you know that you are not alone and that you are making a difference in the world.

There are many volunteer organizations in Northwest Indiana that provide a variety of services to the community and for all ages and circumstances. Often times, networking through these organizations bring a sense of purpose and association that can help lift spirits for those with the holiday blues. If you are still uncertain, just spend a little time on the internet or at the library learning about these clubs.

My hope is that everyone can find a way to make the holidays meaningful and a little more enjoyable. When it comes to holiday shopping, remember that the value of the gift is not in its price tag but in the thoughtfulness. A little more thought with less expense will likely make for a more peaceful holiday season.

If you need our assistance, please do not hesitate to call. This is our busy time of year with the volume of calls, but this should not deter you from calling. When holiday shopping, you should shop with a companion or in a group. And one other safety tip is to take your time and be patient with the holiday traffic. Most accidents that occur happen due to feeling rushed or distracted.

On Wednesday, November 2<sup>nd</sup>, we requested permission from the Board of Public Works and Safety to participate in our Grizzly November. All officers will be permitted to wear neatly groomed facial hair, beards, goatees, etc... up until Christmas Eve. Officers raised \$500 last year and donated to St. Jude's Children's Hospital. This year the goal is to raise \$1000 for a local charity. The officers enjoy the break from the razor, and it is for a good cause.

*Chief Rick Zormier*

## **DID YOU KNOW?**

### **Officers Feloniously Killed 2015**

In 2015, 41 law enforcement officers died from injuries incurred in the line of duty during felonious incidents. Line-of-duty deaths occurred in 21 states and in Puerto Rico.

### **Circumstances**

8 officers died as a result of investigating suspicious persons or circumstances.

7 officers were killed as a result of tactical situations (barricaded offender, hostage taking, high-risk entry, etc.).

6 officers were fatally injured during traffic pursuits or stops.

5 officers died as a result of arrest situations.

4 officers were killed in ambush situations.

3 officers who died had responded to disturbance calls.

3 officers were killed in unprovoked attacks.

2 officers were fatally injured while handling, transporting, or maintaining custody of prisoners.

2 officers were handling persons with mental illness.

1 officer was conducting an investigative activity (surveillance, search, interview, etc.).

## **Internet Fraud**

Protect yourself and your family from various forms of Internet fraud.

### **How to Protect Your Computer**

#### **Keep Your Firewall Turned On**

A firewall helps protect your computer from hackers who might try to gain access to crash it, delete information, or even steal passwords or other sensitive information. Software firewalls are widely recommended for single computers. The software is prepackaged on some operating systems or can be purchased for individual computers. For multiple networked computers, hardware routers typically provide firewall protection.

#### **Install or Update Your Antivirus Software**

Antivirus software is designed to prevent malicious software programs from embedding on your computer. If it detects malicious code, like a virus or a worm, it works to disarm or remove it. Viruses can infect computers without users' knowledge. Most types of antivirus software can be set up to update automatically.

#### **Install or Update Your Antispyware Technology**

Spyware is just what it sounds like—software that is surreptitiously installed on your computer to let others peer into your activities on the computer. Some spyware collects information about you without your consent or produces unwanted pop-up ads on your web browser. Some operating systems offer free spyware protection, and inexpensive software is readily available for download on the Internet or at your local computer store. Be wary of ads on the Internet offering downloadable antispyware—in some cases these products may be fake and may actually contain spyware or other malicious code. It's like buying groceries—shop where you trust.

#### **Keep Your Operating System Up to Date**

Computer operating systems are periodically updated to stay in tune with technology requirements and to fix security holes. Be sure to install the updates to ensure your computer has the latest protection.

#### **Be Careful What You Download**

Carelessly downloading e-mail attachments can circumvent even the most vigilant anti-virus software. Never open an e-mail attachment from someone you don't know, and be wary of forwarded attachments from people you do know. They may have unwittingly advanced malicious code.

#### **Turn Off Your Computer**

With the growth of high-speed Internet connections, many opt to leave their computers on and ready for action. The downside is that being "always on" renders computers more susceptible. Beyond firewall protection, which is designed to fend off unwanted attacks, turning the computer off effectively severs an attacker's connection—be it spyware or a botnet that employs your computer's resources to reach out to other unwitting users.

It's that time of year again when the mornings will be a little lighter and the evenings a little darker.

Remember to  
Fall Back on

Sunday November 6th! Daylight Saving  
Time ends on November 6th so turn your  
clocks back 1 hour.

### **Found Property**

October 22, 2016

Cell Phone Found

**0 Juveniles Arrested****Code Enforcement Section-Sgt. Ron Russo**

Hello all,

With autumn upon us, it's time to start preparing for a NWI winter. That most likely means snow. In Code Enforcement we will begin proactively checking neighborhoods for obviously inoperable/abandoned vehicles parked in the roadway. When located we will be tagging them for 72 hours, and if they are still present in the roadway they will be towed. Hopefully by proactively eliminating abandoned vehicles on the streets over the winter, the snow plows can be more effective, and the roads can be plowed properly without too much narrowing of the street.

One result of tagging these vehicles sometimes is that the owner will just move the vehicle into their driveway to avoid the tow. And, although I understand some folks reluctance to give up their old vehicles, if the vehicle is mechanically inoperable or missing parts, even if parked on private property, it is still considered an abandoned/junk vehicle. If/when this occurs, Code Enforcement officers will be making contact with the owner to provide them with the options. The City of Hobart has a junk vehicle ordinance that states an inoperable vehicle cannot be parked sheltered upon private property for a period over 3 days. Indiana code is a bit different, and would require code officers to tag the vehicle another 20 days, then 72 hours after that before towing. Whichever option is pursued, understand removing that inoperable/junk vehicle could still take some time. Our goal in Code Enforcement is not to issue citations, or tow every vehicle we can - but to gain compliance within the Hobart Municipal Code and find a solution that both the City and the property owner can be satisfied with.

Thank you,

Sgt. Ronald Russo  
 Hobart Police Department Code Enforcement Services
